Type A Custom
 145.0"w X 27.4"h
 Double Sided, Overhead
Post Mounted

Direct Print Face

(A) .080NG, .25 White polycarb;
 Artwork: Use artwork on rendering;
 Background: Dove 10% Tint
 Grass Color: Dove 50% Tint (Opacity 40%)

Backer - Painted Acrylic

(B) Thickness: .25"
 Finish on Face, Edge and Backpainted:
 painted to match PMS 299C
 Mounting: Clevises and buttons

Direct Print Copy/Graphics

(C) White, Print to match PMS 299C, PMS 285C
 Font: Meta B 770 wt

Metal Accent

(D) Natural 5/8" Buttons
 buttons with custom threaded stand-offs
 to connect panels

Mounting Hardware

(E) Square Tube Rail and Posts
 to accommodate electrical

Illuminated Letters - Painted face/glowing sides

(F) 30mm Deep Face
 LED Illumination - Remote Power Supplies
 Face Finish: Painted **C0104** White
 Mounting: Custom

Tactile Wall Mounted Signs:

These guidelines comply with the current Federal Law as published in “2010 ADA Standards for Accessible Design” publication, pgs. 189 – 190. Published September 15, 2010, revised March 1, 2011. For more information: www.ada.gov/2010ADAstandards_index.htm

703.4.1 Height Above Finish Floor or Ground. Tactile characters on signs shall be located 48 inches (1220 mm) minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60 inches (1525 mm) maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character.

EXCEPTION: Tactile characters for elevator car controls shall not be required to comply with 703.4.1.

NOTE: When visual sign field is utilized, the visual field will have a mounting height of 40 inches minimum.

703.4.2 Location. Where a tactile sign is provided at a door, the sign shall be located alongside the door at the latch side. Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf. Where a tactile sign is provided at double doors with two active leaves, the sign shall be located to the right of the right hand door. Where there is no wall space at the latch side of a single door or at the right side of double doors, signs shall be located on the nearest adjacent wall. Signs containing tactile characters shall be located so that a clear floor space of 18 inches (455 mm) minimum by 18 inches (455 mm) minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degree open position.

EXCEPTION: Signs with tactile characters shall be permitted on the push side of doors with closers and without hold-open devices.

Takeform Standard: Signs that have a permanent room identifier shall be mounted 60" above finished floor to the top of the sign. This is an interpretation of the Accessibility Guidelines.

Tactile Wall Mounted Restroom Signs:

These guidelines comply with the current Federal Law as published in “2010 ADA Standards for Accessible Design” publication, pgs. 189 – 190. Published September 15, 2010, revised March 1, 2011. For more information: www.ada.gov/2010ADAstandards_index.htm

703.4.1 Height Above Finish Floor or Ground. Tactile characters on signs shall be located 48 inches (1220 mm) minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60 inches (1525 mm) maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character.

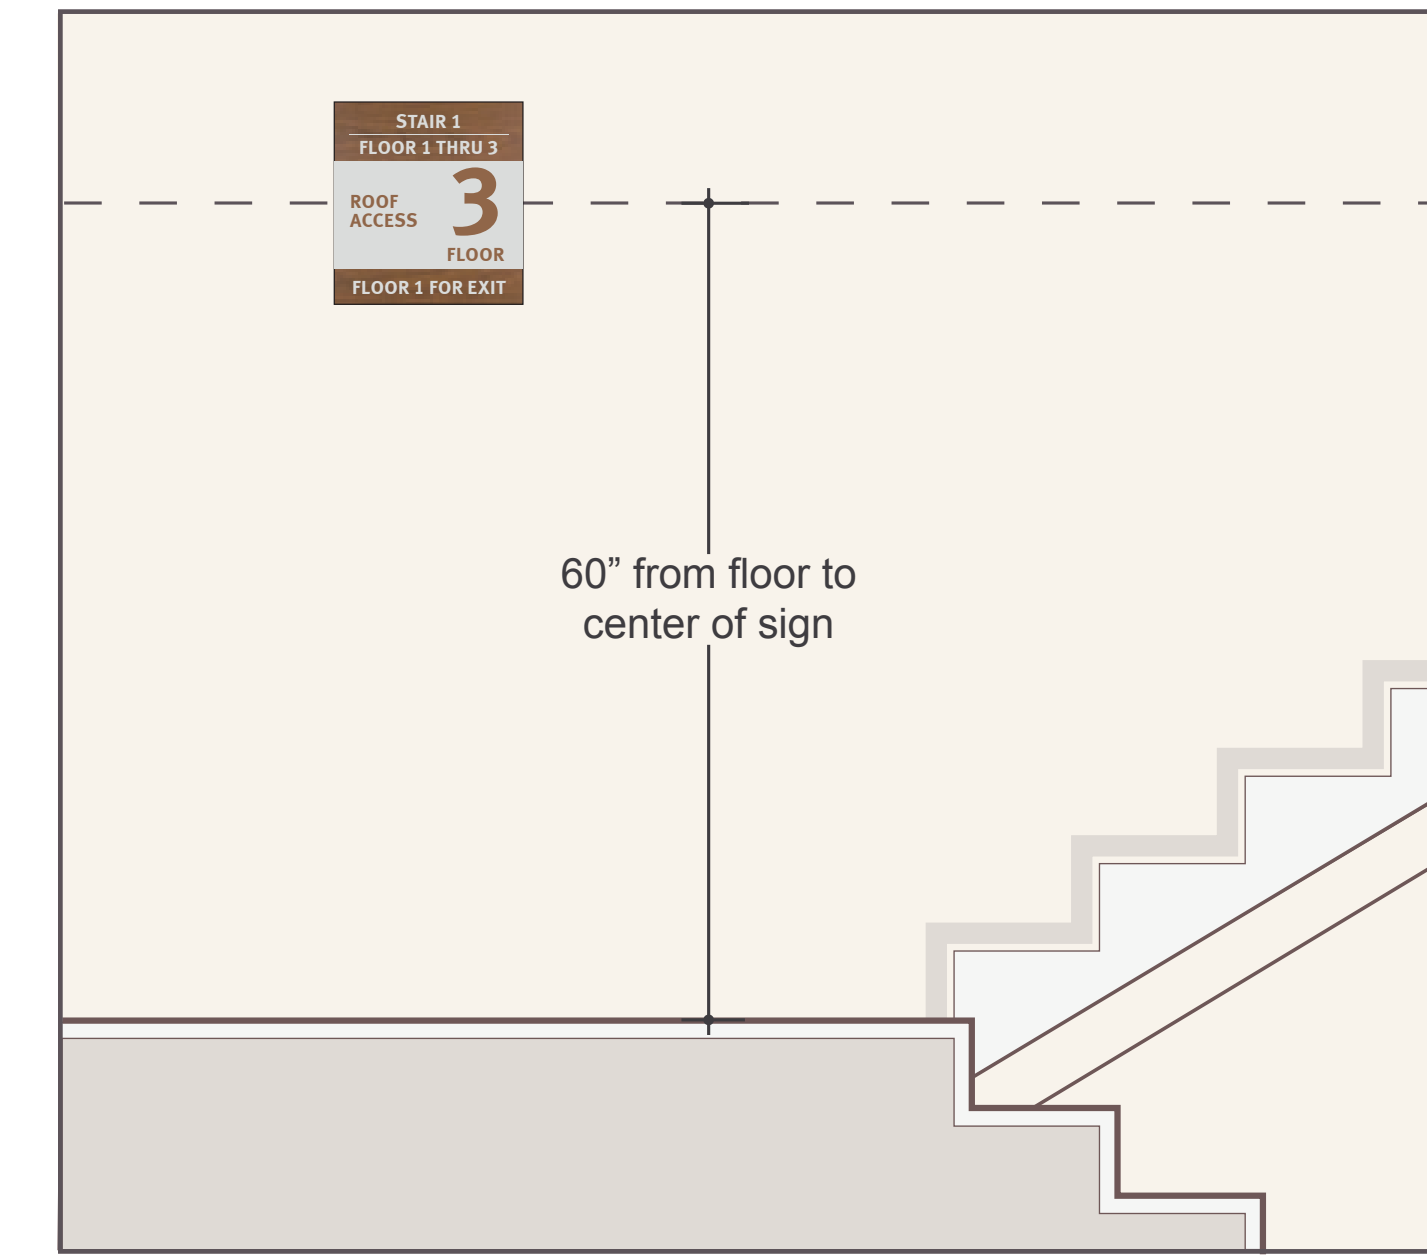

EXCEPTION: Tactile characters for elevator car controls shall not be required to comply with 703.4.1.

NOTE: When visual sign field is utilized, the visual field will have a mounting height of 40 inches Minimum.

703.4.2 Location. Where a tactile sign is provided at a door, the sign shall be located alongside the door at the latch side. Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf. Where a tactile sign is provided at double doors with two active leaves, the sign shall be located to the right of the right hand door. Where there is no wall space at the latch side of a single door or at the right side of double doors, signs shall be located on the nearest adjacent wall. Signs containing tactile characters shall be located so that a clear floor space of 18 inches (455 mm) minimum by 18 inches (455 mm) minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degree open position.

EXCEPTION: Signs with tactile characters shall be permitted on the push side of doors with closers and without hold-open devices.

Takeform Standard: Signs for Restrooms shall be mounted 60" above finished floor to the top of the sign. This is an interpretation of the Accessibility Guidelines.

Interior Stair ID Signs:

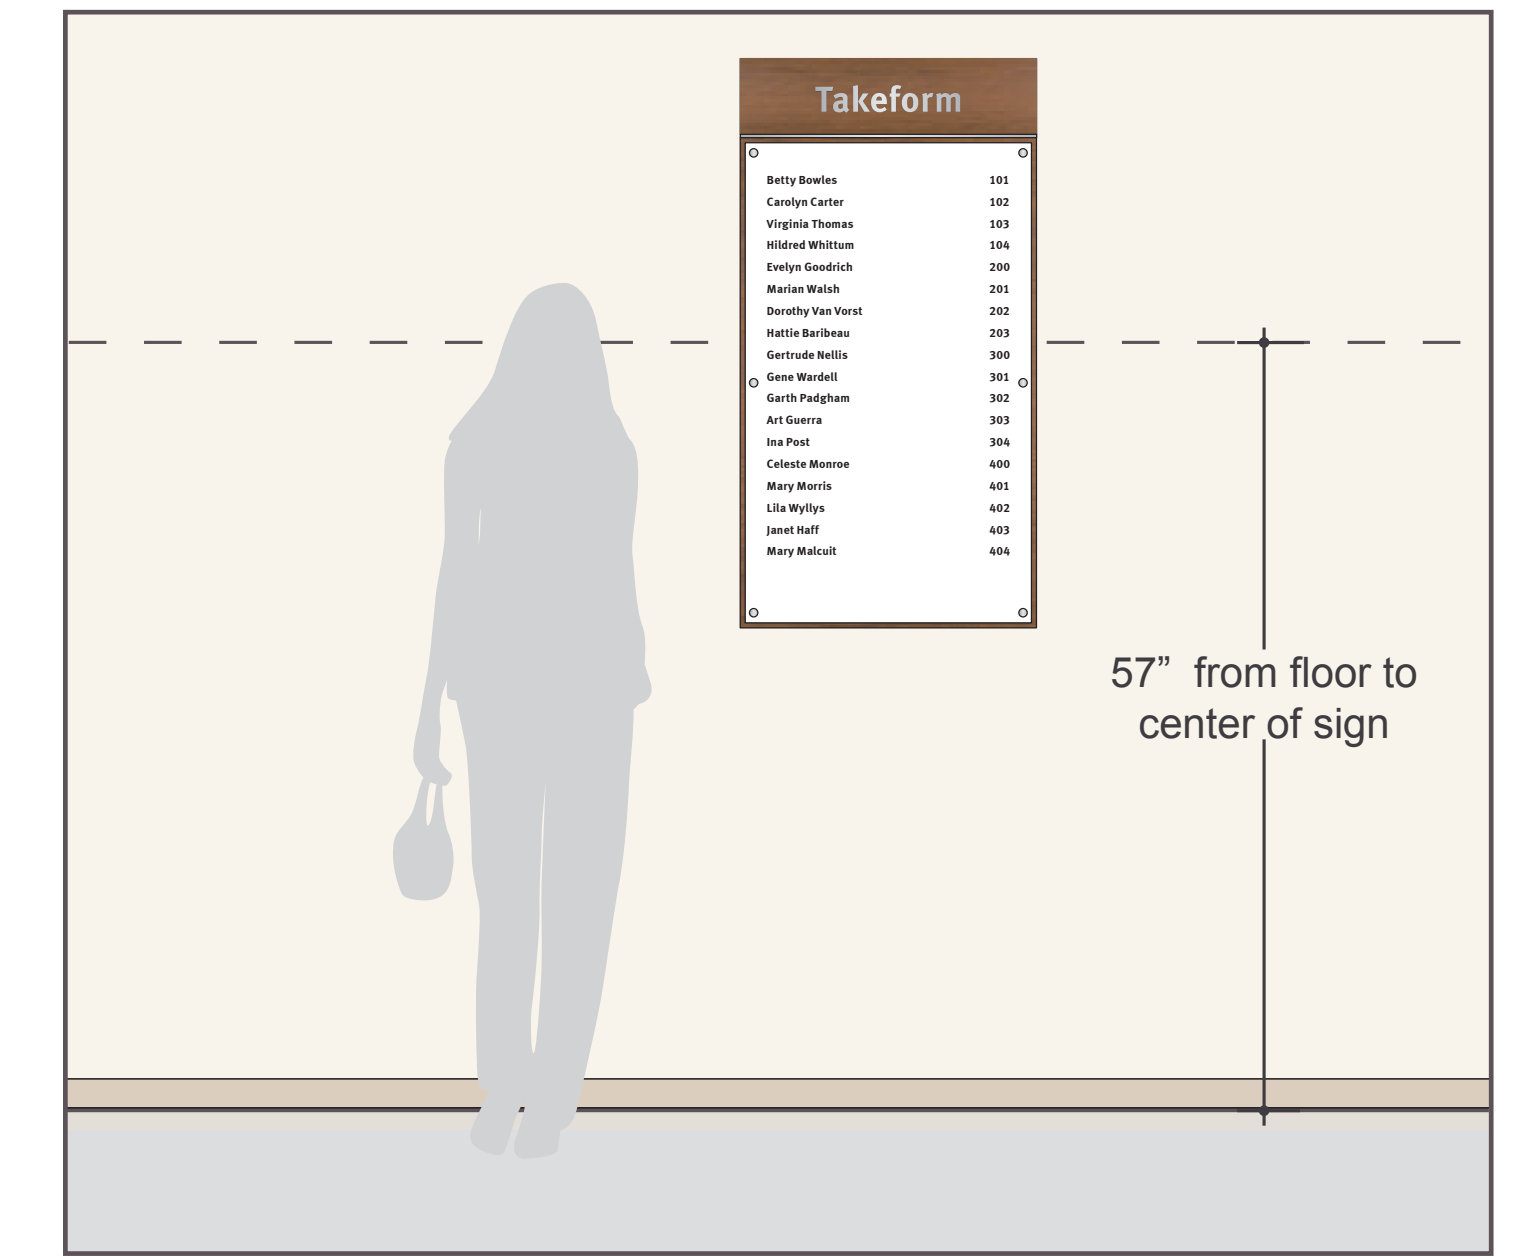

These guidelines are derived from NFPA 101, 2009, pg. 101 - 58.

7.2.2.5.4 Stair Identification

7.2.2.5.4.1 New enclosed stairs serving three or more stories and existing enclosed stairs serving five or more stories shall comply with 7.2.2.5.4.1 (A) through (M). **(A)** The stairs shall be provided with special signage within the enclosure at each floor landing. **(B)** The signage shall indicate the floor level. **(C)** The signage shall indicate the terminus of the top and bottom of the stair enclosure. **(D)** The signage shall indicate the identification of the stair enclosure. **(E)** The signage shall indicate the floor level of, and the direction to, exit discharge. **(F)** The signage shall be located inside the enclosure approximately 60 in. (1525 mm) above the floor landing in a position that is visible when the door is in the open or closed position. **(G)** The signage shall comply with 7.10.8.1 and 7.10.8.2 of this Code. **(H)** The floor level designation shall also be tactile in accordance with ICC/ANSI A117.1, *American National Standard for Accessible and Usable Buildings and Facilities*. **(I)** The signage shall be painted or stenciled on the wall or on a separate sign securely attached to the wall. **(J)** The stairway identification letter shall be located at the top of the sign in minimum 1 in. (25mm) high lettering and shall be in accordance with 7.10.8.2. **(K)** Signage that reads NO ROOF ACCESS and is located under the stairway identification letter shall designate stairways that do not provide roof access. Lettering shall be a minimum of 1 in. (25mm) high and shall be in accordance with 7.10.8.2. **(L)** The floor level number shall be located in the middle of the sign in minimum 5 in. (125 mm) high numbers and shall be in accordance with 7.10.8.2. Mezzanine levels shall have the letter "M" or other appropriate identification letter preceding the floor number, while basement levels shall have the letter "B" or the appropriate identification letter preceding the floor level number. **(M)** Identification of the lower and upper terminus of the stairway shall be located at the bottom of the sign in minimum 1 in. (25 mm) high letters or numbers and shall be in accordance with 7.10.8.2.

7.2.2.5.4.2 Wherever an enclosed stair requires travel in an upward direction to reach the level of exit discharge, special signs with directional indicators showing the direction to the level of exit discharge shall be provided at each floor level landing from which upward direction of travel is required, unless otherwise provided in 7.2.2.5.4.2 (A) and 7.2.2.5.4.2 (B), and the following also shall apply: **(1)** Such signage shall comply with 7.10.8.1 and 7.10.8.2. **(2)** Such signage shall be visible when the door leaf is in the open or closed position. **(A)** The requirement of 7.2.2.5.4.2 shall not apply where signs required by 7.2.2.5.4.1 are provided. **(B)** The requirement of 7.2.2.5.4.2 shall not apply to stairs extending not more than one story below the level of exit discharge where the exit discharge is clearly obvious.

Takeform Standard: Follows 7.2.2.5.4.1 section (F) for mounting heights.

Directories:

These guidelines comply with the current Federal Law as published in “2010 ADA Standards for Accessible Design” publication, pg. 71.

216.1 General. Signs shall be provided in accordance with 216 and shall comply with 703.

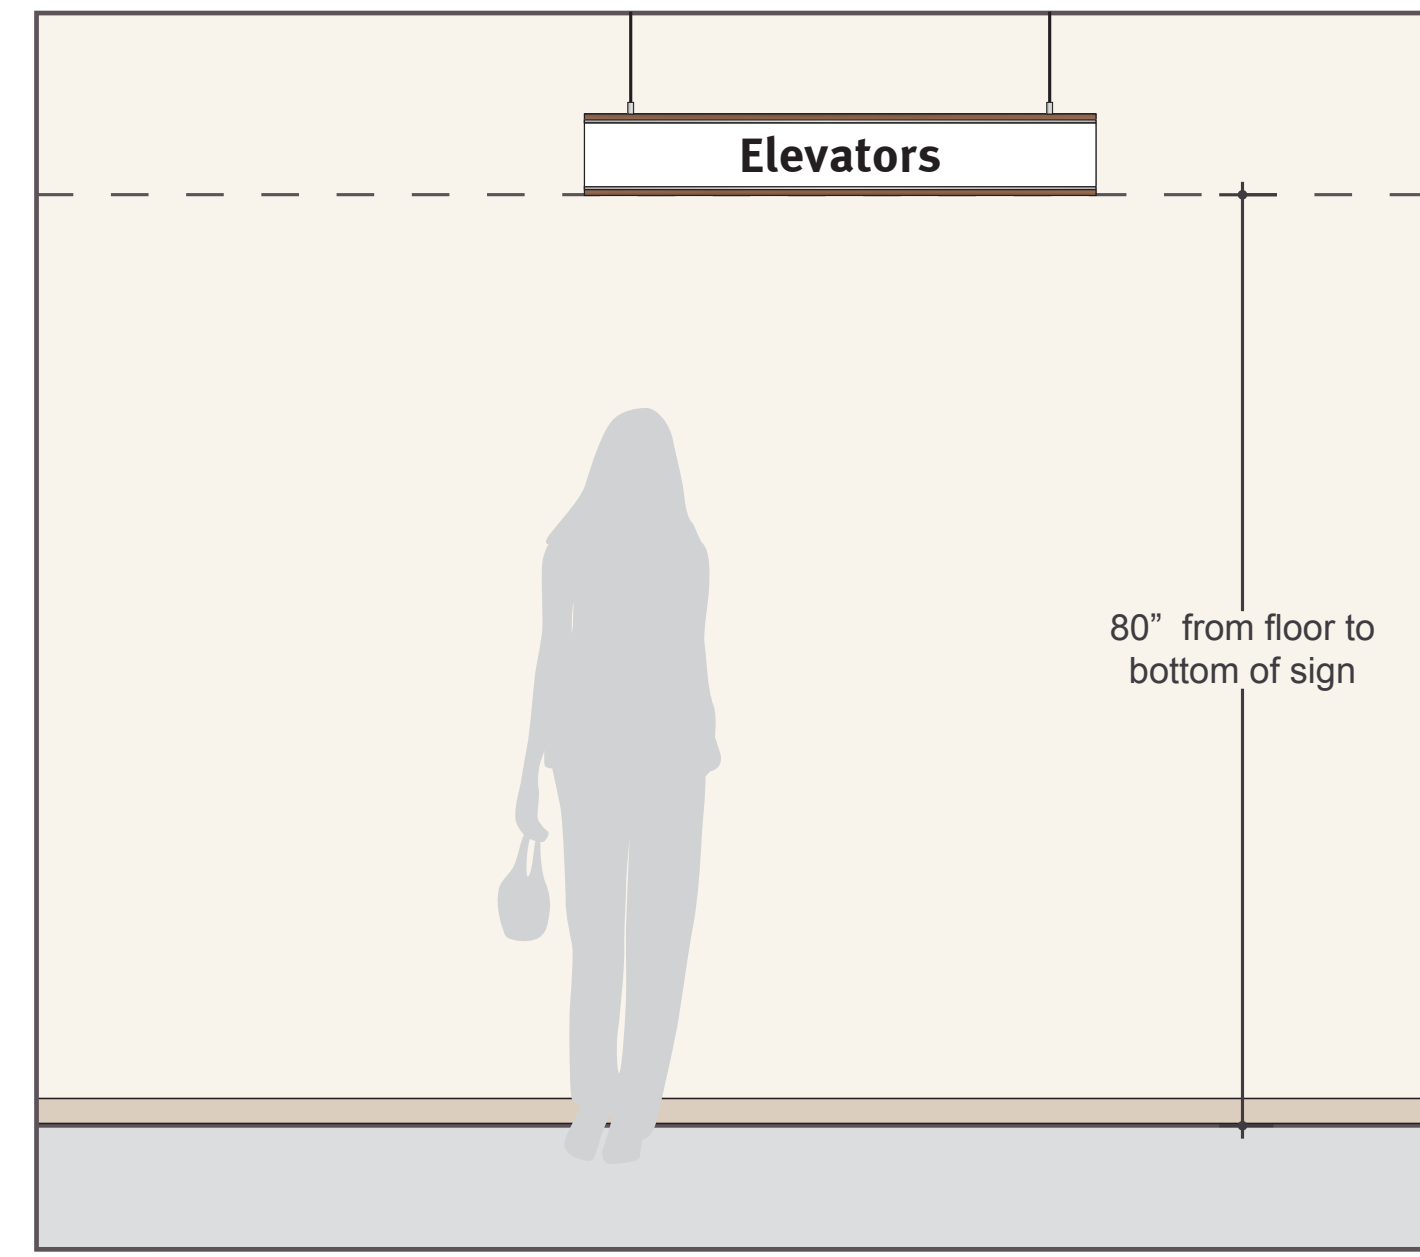

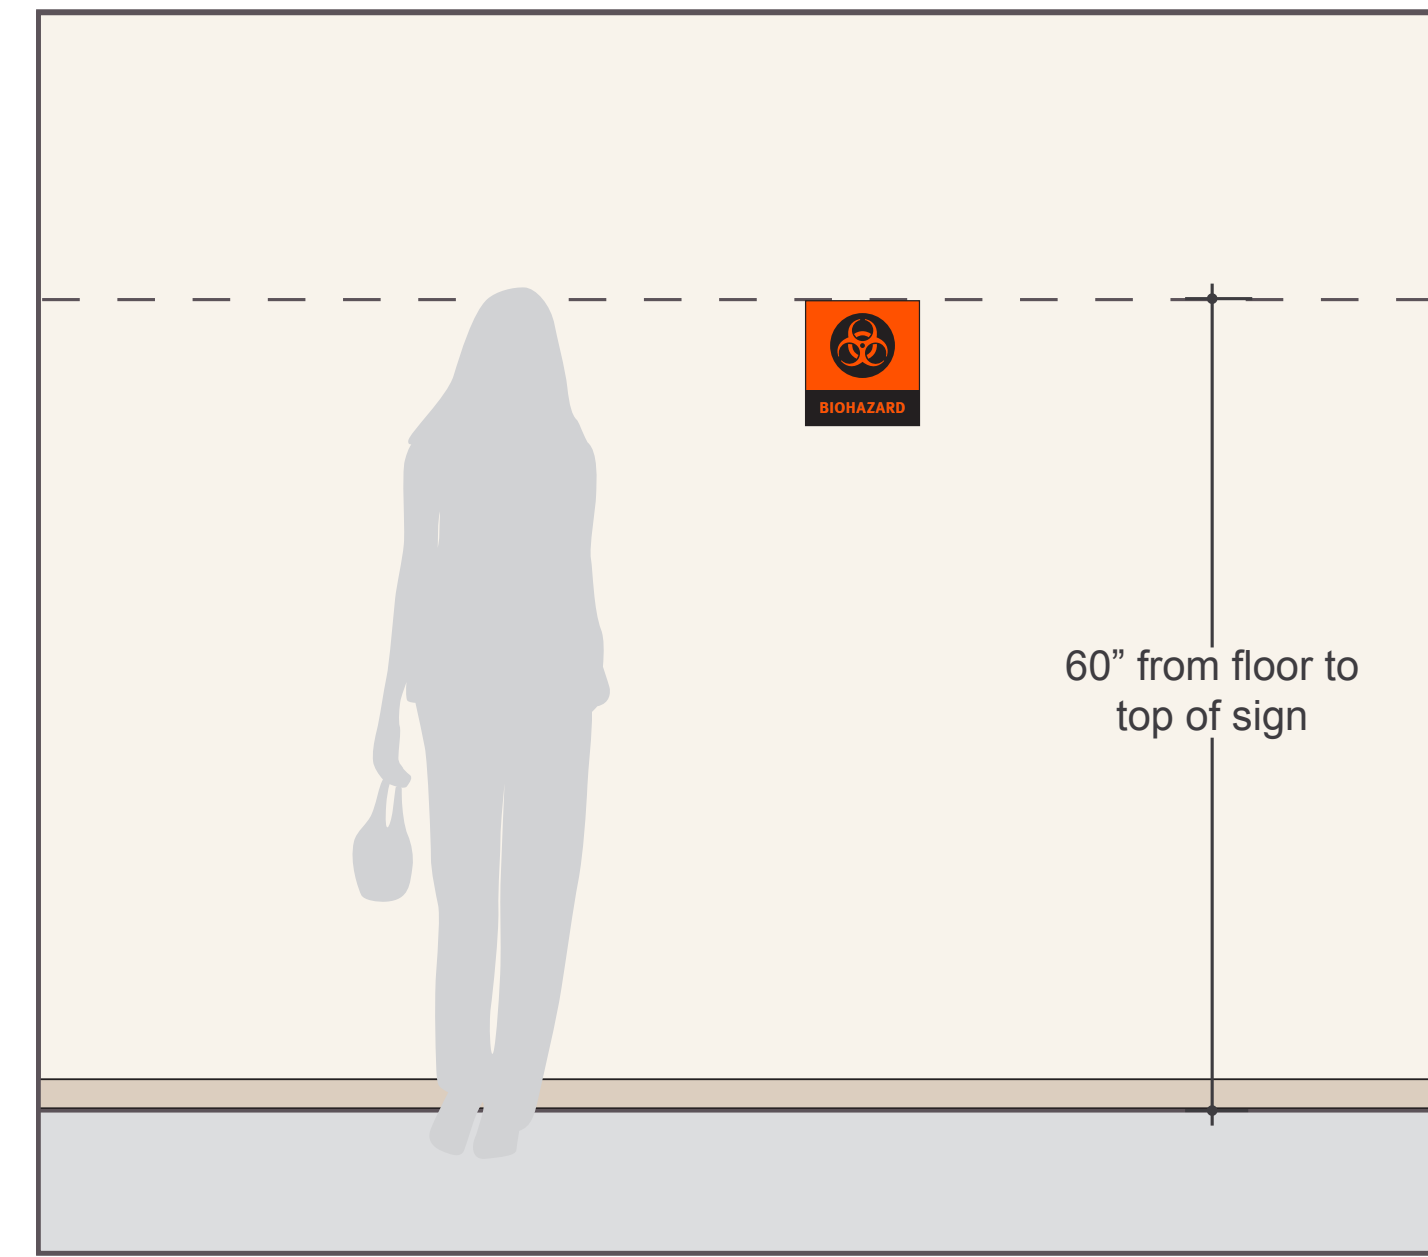

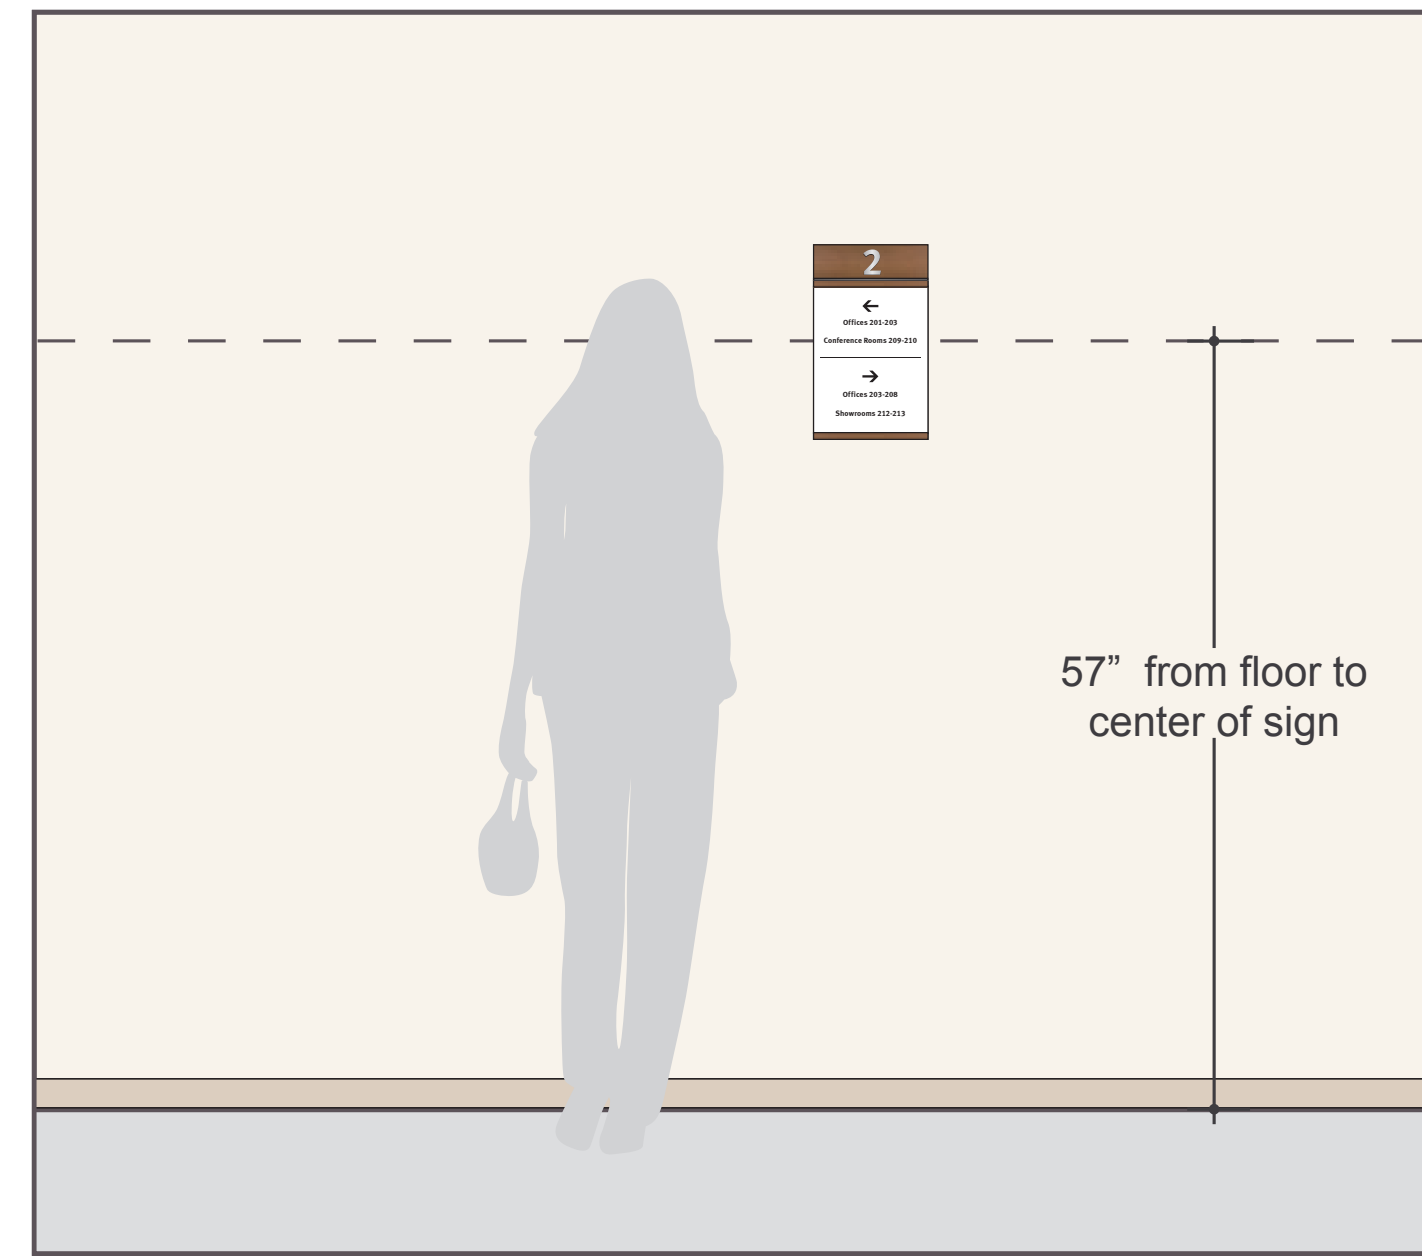

EXCEPTIONS: 1. Building directories, menus, seat and row designations in assembly areas, occupant names, building addresses, and company names and logos shall not be required to comply with 216.

703.5 Visual Characters. Visual characters shall comply with 703.5.

EXCEPTION: Where visual characters comply with 703.2 and are accompanied by braille complying with 703.3, they shall not be required to comply with 703.5.2 through 703.5.9.

703.5.6 Height From Finish Floor or Ground. Visual characters shall be 40 inches (1015 mm) minimum above the finish floor or ground.

Takeform Standard: Signs over 14" with no Braille shall be mounted 57" above finished floor to the center of the sign. This is an interpretation of the Accessibility Guidelines.

Visual Wall Mounted Signs/Evacuation Maps (Greater Than 14” High):

These guidelines comply with the current Federal Law as published in “2010 ADA Standards for Accessible Design” publication, pg. 71.

216.1 General. Signs shall be provided in accordance with 216 and shall comply with 703.

EXCEPTIONS: 1. Building directories, menus, seat and row designations in assembly areas, occupant names, building addresses, and company names and logos shall not be required to comply with 216. 703.5 Visual Characters. Visual characters shall comply with 703.5.

EXCEPTION: Where visual characters comply with 703.2 and are accompanied by braille complying with 703.3, they shall not be required to comply with 703.5.2 through 703.5.9. 703.5.6 Height From Finish Floor or Ground. Visual characters shall be 40 inches (1015 mm) minimum above the finish floor or ground.

Takeform Standard: Signs over 14” with no Braille shall be mounted 57” above finished floor to the center of the sign. This is an interpretation of the Accessibility Guidelines.

Visual Wall Mounted Signs (Less Than 14” High):

216.1 General. Signs shall be provided in accordance with 216 and shall comply with 703.

EXCEPTIONS: 1. Building directories, menus, seat and row designations in assembly areas, occupant names, building addresses, and company names and logos shall not be required to comply with 216. 703.5 Visual Characters. Visual characters shall comply with 703.5.

EXCEPTION: Where visual characters comply with 703.2 and are accompanied by braille complying with 703.3, they shall not be required to comply with 703.5.2 through 703.5.9. 703.5.6 Height From Finish Floor or Ground. Visual characters shall be 40 inches (1015 mm) minimum above the finish floor or ground.

Takeform Standard: Signs less than 14” with no Braille shall be mounted 60” above finished floor to the top of the sign. This is an interpretation of the Accessibility Guidelines.

Overhead Mounted Signs:

307.2 Protrusion Limits. Objects with leading edges more than 27 inches (685 mm) and not more than 80 inches (2030 mm) above the finish floor or ground shall protrude 4 inches (100 mm) maximum horizontally into the circulation path.

307.3 Post-Mounted Objects. Free-standing objects mounted on posts or pylons shall overhang circulation paths 12 inches (305 mm) maximum when located 27 inches (685 mm) minimum and 80 inches (2030 mm) maximum above the finish floor or ground. Where a sign or other obstruction is mounted between posts or pylons and the clear distance between the posts or pylons is greater than 12 inches (305 mm), the lowest edge of such sign or obstruction shall be 27 inches (685 mm) maximum or 80 inches (2030 mm) minimum above the finish floor or ground.

307.4 Vertical Clearance. Vertical clearance shall be 80 inches (2030 mm) high minimum. Guardrails or other barriers shall be provided where the vertical clearance is less than 80 inches (2030 mm) high. The leading edge of such guardrail or barrier shall be located 27 inches (685 mm) maximum above the finish floor or ground.

Takeform Standard: Follows 307.2 - 307.4 for mounting heights.

Flag Mounted Signs:

307.2 Protrusion Limits. Objects with leading edges more than 27 inches (685 mm) and not more than 80 inches (2030 mm) above the finish floor or ground shall protrude 4 inches (100 mm) maximum horizontally into the circulation path.

307.3 Post-Mounted Objects. Free-standing objects mounted on posts or pylons shall overhang circulation paths 12 inches (305 mm) maximum when located 27 inches (685 mm) minimum and 80 inches (2030 mm) maximum above the finish floor or ground. Where a sign or other obstruction is mounted between posts or pylons and the clear distance between the posts or pylons is greater than 12 inches (305 mm), the lowest edge of such sign or obstruction shall be 27 inches (685 mm) maximum or 80 inches (2030 mm) minimum above the finish floor or ground.

307.4 Vertical Clearance. Vertical clearance shall be 80 inches (2030 mm) high minimum. Guardrails or other barriers shall be provided where the vertical clearance is less than 80 inches (2030 mm) high. The leading edge of such guardrail or barrier shall be located 27 inches (685 mm) maximum above the finish floor or ground. **Takeform Standard:** Follows 307.2 - 307.4 for mounting heights.

Maximum Occupancy Signs:

International Building Code, 2009
1004.3 Posting of occupant load. Every room or space that is an assembly occupancy shall have the occupant load of the room or space posted in a conspicuous place, near the main exit or exit access doorway from the room or space. Posted signs shall be of an approved legible permanent design and shall be maintained by the owner or authorized agent.

Takeform Standard: Every room or space that is an area of assembly shall have the occupant load of the room or space centered above the door, 2” off the door trim, near the main access doorway. Signs shall have 1-inch block letters and numbers on a contrasting background so as to be readily visible. A sign with changeable numbers is not permitted. This is an interpretation of the International Building Code.
