UNC Wilmington Alderman and King Hall Renovation

SCO ID#: 22-24639-01A

Addendum Number 1: June 29, 2023

Project: UNCW King Hall Renovation
601 Hamilton Drive
Wilmington, NC 28403

CMaR Contractor: Muter Construction, LLC.
Preconstruction Contact: Brad Milne
Office: 919-404-8330
Mobile: 919-397-6971
Email: bmilne@muterconstruction.com

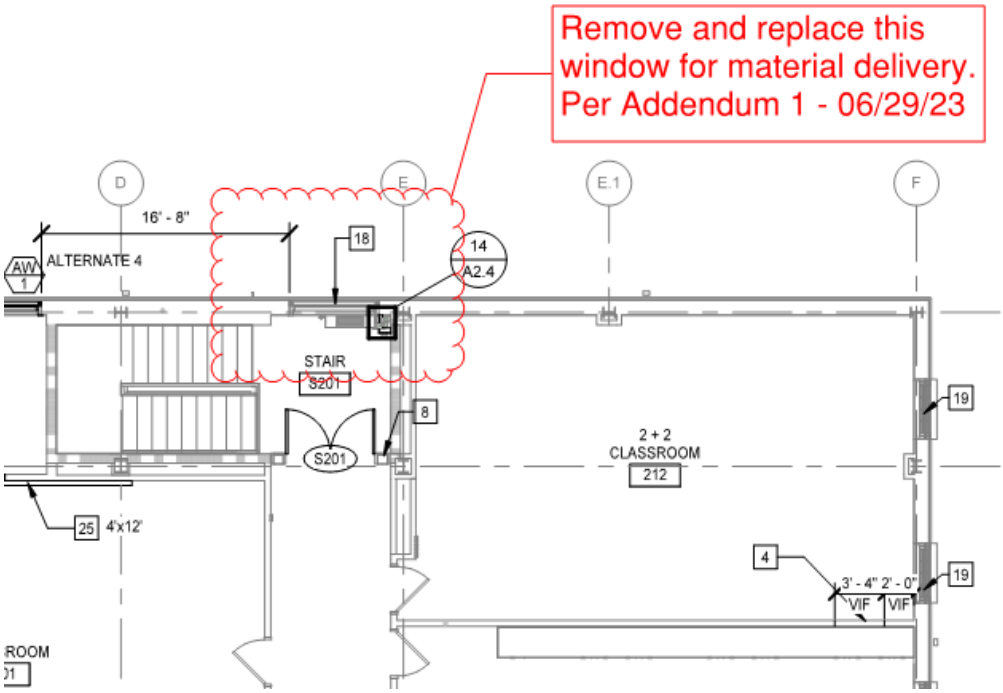
Addendum One has been issued for your review. The following items are included in this document.

1) Bid Date and time are now as follows:
    a. Bid Date: July 25th, 2023. Bids are due by 2:00pm. Bid will be opened starting at 2:00pm.
    b. Bid delivery:
        i. **Hand-delivered to UNCW Veterans Hall (Room 1032) 1040 Walton Dr., Wilmington, NC, between 1:00 - 2:00 PM on July 25, 2023.** Paid Parking is available in East Parking Deck (971 Reynolds Dr.), or free parking is available at Visitor Lot (4941 Riegel Rd., Wilmington).
        ii. **Mailed/shipped to Muter Construction (c/o Brad Milne) 111 E. Vance Street, Zebulon, NC 27597. Mailed or shipped bids to Muter must be received by 5:00 pm on July 24, 2023.**
    c. Bid opening location:
        i. **UNCW Veterans Hall (Room 1032) 1040 Walton Dr., Wilmington, NC**
2) Please place your sealed bid inside an envelope if mailing. On the cover of your sealed bid envelope please clearly state the following:

    Proposal for UNCW King Hall Renovation
    SCO ID# 22-24639-01A
    Your Company Name
    Bid Package Number(s) and Description(s)
3) It is the bidder's responsibility that bids be received on time and at the proper location prior to the closing time.
4) If bidding multiple packages, you must submit separate envelopes for each package.
5) Please do not visit the project site any other time without first notifying and coordinating with Brad Milne at Muter Construction. Contact information is at the top of this addendum.
6) Bidders are reminded to review all drawings, specifications and bid manual documents so they provide a complete bid. Exclusions or qualifications are grounds for disqualification.
7) **Bids MUST INCLUDE** the following or they may be considered non-responsive and not opened:
    a. Form of Proposal
    b. Minority Business Participation Forms - Bid must include:
        i. Identification of HUB Certified / Minority Business Participation

ii. Either Affidavit A or Affidavit B
iii. Bid Bond of 5% (if bids are equal to or greater than $500,000)

8) The HUB and Minority Business Participation goal for this project is 10%.
9) Payment and Performance Bonds are required to be included in your bid price if your bid price is equal to or greater than $300,000.00.
10) Specification Section 000102 – Supplementary General Conditions Article 23 – Time of Completion, Delays, Extensions, section "i" Liquidated Damages shall be changed to $500/day.
11) BP23 – HVAC Installation shall include the following in their base bid:
    a. $9,000 for AHU storage
    b. $5,000 for extended AHU warranty.
12) During demolition or abatement, if removal of items includes removing supports for items that are connected to materials to be removed, ie. pipe supports or j-boxes, as shown in the attached photos of the chimney in the Mechanical room, those items shall be temporarily supported by the demo contractor during their work and provisions made for adjustments and permanent support or connections upon completion of their work and shall be accounted for and included in their pricing. This shall be the same for all floors.
13) The current construction schedule is as follows (10 months):
    a. Anticipated NTP – August 14th, 2023
    b. Anticipated Substantial Completion Date – June 14th, 2024
14) Plan sheet E2.1.1 Attic Plan – Lighting is old and does not apply. This was replaced with sheet E2.3 – Attic & Roof Plans dated Feb. 10, 2023.
15) Bid questions have been asked are listed here below with responses:
    a. **Question**: Can we remove a window for material delivery?
    Answer: The window shown below at Stair 201 shall be removed, stored on site in Room 104 and wrapped in plastic by BP02 – Selective Demolition and Abatement. The window shall be replaced by BP08A – Aluminum Storefront-Windows-Glazing and BP09E – Paint-Wall Coverings shall carry an allowance of $2,500 for paint and repair work. A temporary removable plywood partition shall be installed by BP01-General Trades and Site Labor. The window to be removed is shown here.



b. **Question**: Are the early AHU's for King Hall only.
Answer: Yes. The early AHU package was for King Hall only. The approved material submittal is attached for reference. The contact for this equipment is John Blakeney, TRS-Sesco. (919) 618-5779 or john.blakeney@coolsys.com if there are any questions regarding material specifications.

c. **Question**: Can we park in the adjacent parking lots.
Answer: Parking in adjacent lots is not acceptable and any tickets received for parking in unapproved areas shall be paid for by the contractor receiving the parking tickets. There will be parking provided in designated fenced areas per the logistics plan. There is also parking available at the "Cinema Lot" across College Road if needed and will be coordinated with UNCW at that time for no charge.

d. **Question:** At the second floor of King Hall there is a new janitor's closet. Will FRP be installed behind the sink 4' in each direction and 4' high? If FRP will be added, please confirm which bid package it will be added to.
Answer: See updated A2.1 sheet indicating FRP locations. This shall be included in BP09A – Drywall-Metal Stud-Insulation bid package.

e. **Question:** Will a combination bid package for drywall and ACT be allowed to provide savings to UNCW?
Answer: Revised Bid Form is attached for BP09A – Drywall-Metal Stud-Insulation which includes an Add Alternate Line for ACT Ceilings.

f. **Question:** Confirm that all drywall ceilings will remain and only be patched.
Answer: The only drywall ceilings to remain are in the Theater and the elevator equipment room on the second floor. The drawings indicate that it is anticipated one corner of the ceilings in the auditorium needing to be removed an patched to do work. The diagonal hatch pattern on the demo drawings describes these locations as well.

g. **Question:** Please clarify the floor patching allowance in BP09B – Ceramic Tiling and BP09D – Flooring.

Answer: The floor patching allowance is for excessive floor patching that may be found after removal of the existing floor finishes and prior to installing new floor finishes. The base bid shall include a normal amount of floor patching.

h. **Question:** Who provides and who installs the putty pads for inwall utility boxes.
Answer: Specification Section 09 29 00 Gypsum Board includes Putty Pads. These shall be provided and installed by BP09A – Drywall-Metal Stud-Insulation package.

i. **Question:** When will plans be released for Alderman?
Answer: Plans are being designed currently for Alderman Hall renovations and are expected to be released for pricing this fall.

j. **Question:** Clarify abatement/demo schedule and number of mobilizations for window removal if Alternate 1 is accepted. Will all windows be allowed to be removed at one time and who protects openings?
Answer: The Abatement/Demo contractor, BP02 – Selective Demolition and Abatement, shall removal all windows in one mobilization. General Trades, BP01-General Trades and Site Labor shall install protection immediately upon window removal to consist of plywood sheeting to create wind/water resistant protection at all window openings. General Trades shall also remove and prepare the openings for the window installation in a manner consistent and acceptable to the installation schedule. All blocking, trim, drywall repair, paint, etc. required upon new window installation shall be by the individual packages assigned to those scopes of work as indicated on their respective bid forms.

k. **Question:** Can you clarify the base bid for abatement and demo for areas that are not to be touched vs. alternates, such as Alt. 3A - Classroom 104 or Alt. 3 - First Floor Offices?
Answer: If alternates are accepted, demo/abatement in those areas is to take place as indicated on the bid forms for alternates. If the alternates are not taken, the demo/abatement shall not take place in those areas.

l. **Question:** Can you clarify who cuts roof openings for new equipment, penetrations, etc.
Answer: Openings in the roof for equipment or penetrations shall be cut by the demo contractor, BP02 – Selective Demolition and Abatement, locations and sizes to be provided by the Mechanical Contractor, BP23 – HVAC Installation. Roofing contractor, BP07 – Roofing, to provide temporary protection of roof openings for watertightness. Equipment curbs to be provided by Mechanical Contractor and set by Roofing Contractor in coordination with each other. Multiple mobilizations may be required by each subcontractor based on schedule of equipment and material delivery. At no time shall the roof openings be unprotected by any trade.

m. **Question:** Can you confirm which trades demo MEP items?
Answer: Electrical contractor, BP26 – Electrical-Communications-Fire Alarm, shall make safe all electrical items. Each trade is responsible for demolition of their items, ie. electrical = Electrical Contractor, plumbing = Plumbing Contractor, mechanical = Mechanical Contractor.

Attachments included in this Addendum:

1. Prebid Sign-in Sheet from 06/22/23
2. Prebid Agenda from 06/22/23
3. Mechanical room pictures indicating items to be supported at completion of demolition.
4. Early Equipment Package Submittal 237313 Modular Indoor AHU's for reference
5. 1963 King Hall Original Drawings
6. A2.1 revised
7. A3.2.1 revised
8. Bid Form BP09A – Drywall-Metal Stud-Insulation-FRP (revised)
9. Bid Form BP09E – Painting-Wall Coverings (revised)
10. Bid Form BP23 – HVAC Installation (revised)

PRE-BID CONFERENCE AGENDA 06.22.23

University of North Carolina Wilmington – King and Alderman Hall Renovations

601 Hamilton Drive
Wilmington, NC

MEETING DATE/LOCATION/TIME:	**June 22, 2023 AT 10:00AM** UNCW King Hall 601 Hamilton Drive, Wilmington, NC

1. **INTRODUCTIONS**
   - Sign In Sheet
   - Introduction of Project Personnel and Review of Roles and Responsibilities

2. **GENERAL INFORMATION**
   - The purpose of the meeting is to provide general information to bidders. Bids should be based on the plans and specifications and not on oral information that was provided at the meeting or at any other time by any of the project participants.
   - This Meeting is non-mandatory for all interested Subcontractors.
   - Plans are available via Building Connected. If you have not already received the plans and specifications, contact Brad Milne with Muter Construction (bmilne@muterconstruction.com) for the online file sharing link to the PDF copies of the documents. No plan deposit is required.

3. **CRITICAL ITEMS FOR BIDDERS**
   - Time and Date for Bids: **Tuesday, July 18, 2023, at 2:00** PM (this is a revised bid date that will be published in Addendum No. 1).
   - Bid Delivery:
     - **Hand-delivered to UNCW** Veterans Hall (Room 1032) 1040 Walton Dr., Wilmington, NC, **between 1:00 - 2:00 PM on July 18, 2023**. Paid Parking is available in East Parking Deck (971 Reynolds Dr.), or free parking is available at Visitor Lot (4941 Riegel Rd., Wilmington).
     - **Mailed/shipped to Muter Construction** (c/o Brad Milne) 111 E. Vance Street, Zebulon, NC 27597. Mailed or shipped bids to Muter must be received **by 5:00 pm on July 17, 2023.**

- Bid Opening Location: UNCW Veterans Hall (Room 1032)
  1040 Walton Drive
  Wilmington, NC 28403

  NOTE: Be sure to allow enough time for parking and for entering the building.

- Bid Bonds will be required for bids equal to or greater than $500,000. P&P bonds will be required for successful bidders if their bid price equal to or greater than $300,000.
- Deadline for Contractor Questions:
  - All questions, substitution requests, and clarification requests shall be submitted to the Construction Manager in writing via email. Neither the Designers nor the Owner shall be responsible for oral instructions.
  - Questions should be emailed to Brad Milne at bmilne@muterconstruction.com. Bidders are asked not to contact the Owner or Design Team consultants directly.
  - All questions, substitution requests, and/or clarifications must be submitted by June 23rd, at COB.

4. **BID OPENING:**
   Sealed proposals will only be received from prequalified, invited Subcontractors and are to be received no later than 2:00 pm on July 18th, 2023, and will be opened and read aloud at 2:00pm starting with the lowest bid package number. Participants may view the formal bid opening in person at the address listed above. Bids that arrive late will not be accepted. It is the bidder's responsibility to make sure the bids are delivered and received on time. Bids must be in a sealed envelope clearly identified on the front as:

   Proposal for UNCW King Hall Renovations
   SCO ID# 22-24639-01A
   Your Company Name
   Bid Package Number and Description

   Prequalification: Bids will be accepted from prequalified bidders only. Please go to www.muterconstruction.com for a list of prequalified bidders for these bid packages.

5. **PROJECT DESCRIPTION:** This project encompasses the renovation of both Alderman Hall and King Hall. Alderman Hall, a two-story 26,108 SF building: envelope repairs, code deficiency corrections (ADA, egress, and restroom improvements), mechanical/electrical replacements, and new finishes in individual suites and corridors. King Hall, a two-story 22,298 SF building: code deficiency corrections (ADA, egress, and restroom improvements), new fire alarm system, mechanical/electrical replacements, programmatic renovations of the second floor to accommodate the Honors College, and new finishes in the public spaces on the first floor.

6. **BID PACKAGES INCLUDED:** (01) General Trades; (02) Selective Demolition and Abatement; (05) Misc. Metals; (06) Architectural Woodwork/Cabinets/Millwork; (07) Roofing; (08A) Aluminum Storefront/Glazing; (08B) Door, Frames & Hardware; (09A) Drywall/Metal Stud Framing/Thermal Insulation; (09B) Tile; (09C) Acoustic Ceilings ;(09D) Flooring; (09E) Painting and Wall Coverings; (10B) Interior Signage; (22) Plumbing; (23) HVAC; (26) Electrical/Communications/Fire Alarm

7. **ADDENDUM:** No addendum has been issued to date.
    - All questions are requested by COB Friday, June 23rd.
    - All bidding RFI's shall be submitted to bmilne@muterconstruction.com only. Emails sent to any other person or email address will not receive a response.
    - All addendums will be issued through Building Connected. If needed via email, please contact Brad Milne.
    - Addendum No. 1 is scheduled to be sent out by Thursday, June 29th. If you do not receive an addendum, please submit a request to bmilne@muterconstruction.com

8. **CONSTRUCTION DURATION**:
    - The work for this project will be between July 2023 and May 2024 (10 months).

9. **SCHEDULE OF ALLOWANCES (spec. section 01 21 00 – Allowances)**
    - Allowance No. 1 – 200 lf of Cat 6 ethernet cable.

10. **UNIT PRICES (spec. section 01 22 00 – Unit Prices)**
    - Unit Price No. 1 – Furnish and install Cat 6 ethernet cable per lf.

11. **ALTERNATES (spec. section 01 23 00 - Alternates)**
    - Alternate No. 1 – Replace existing windows
    - Alternate No. 2 – Recoat flat roof
    - Alternate No. 3 – Carpet, paint, base in first floor offices
    - Alternate No. 3A – Carpet, paint, base in Classroom 104
    - Alternate No. 4 – Install 2 new windows and window shades in exterior wall
    - Alternate No. 5 – Scrape and paint exterior wood trim
    - Alternate No. 6 – Replace door frames with new rate frames w/ rated glass
    - Alternate No. 7 – Wayfinding signage
    - Alternate No. 8 – Remodel and reconfigure first floor men's toilet room
    - Alternate No. 9 – Heat pump water heater

SCHEDULE OF PROPRIETARY ALTERNATES

- Alternate No. 10 – Door hardware
- Alternate No. 11 – Building automation controller and flow meters
- Alternate No. 12 – Communications horizontal cabling system
- Alternate No. 13 – Two-way communication system
- Alternate No. 14 – Fire Alarm System

12. **Minority/HUB Participation:** The goal for this project for minority/HUB participation is ten percent (10%). Please reference the bid package manual for minority forms and additional information regarding minority/HUB requirements. Contact Brad Milne at bmilne@muterconstruction.com or by phone at (919) 397-6971 (cell) or (919) 404-8330 (office) for inquiries regarding minority/HUB participation or other questions and requirements.
13. Thank you for coming. Questions?

SUBMITTAL REVIEW COMMENTS

Project		Project No.	Date
UNCW – Alderman Hall and King Hall Renovations		620589	02/27/2023
Submittal Title	**Section**	**Reviewed By**	**Submittal No.**
Modular Indoor AHU's - Early Equipment Package	237313	SJL	237313-2.0

NOTES

IF THIS SUBMITTAL CONTAINS DEVIATIONS FROM THE CONTRACT DOCUMENTS, IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO SPECIFICALLY INFORM THE ARCHITECT IN WRITING OF ALL SUCH DEVIATIONS; AND ALL SUCH DEVIATIONS SHALL BE INCORPORATED INTO THE CONTRACT DOCUMENTS BY THE ISSUANCE OF ONE OF THE FOLLOWING AUTHORIZING SUCH DEVIATIONS, PRIOR TO PROCEEDING WITH FABRICATION, MANUFACTURE AND/OR CONSTRUCTION:

1) Field Clarification (or other form used to convey minor changes to the Work);
2) Change Order; or
3) Construction Change Directive

This review and these comments are subject to the limitations indicated in the *General Conditions of the Contract for Construction*, and as follows:

1) Architect's review is for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents;
2) Architect's review is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which shall remain the responsibility of the Contractor as required by the Contract Documents;
3) Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures; and
4) Architect's approval as noted of a specific item shall not indicate approval as noted of an assembly of which the item is a component.

Notations indicated on this submittal do not relieve the Contractor from complying with the requirements of the Contract Documents.

The Contractor shall verify that all necessary approvals as noted are obtained prior to proceeding with the fabrication, manufacturing, purchasing, and/or construction of any item, component, system, or assembly.

The Contractor's responsibilities include, but are not limited to, the following:

1) Correlation and confirmation of dimensions and quantities;
2) Means, methods, techniques, sequences, and procedures of construction;
3) Coordination of the Work of all trades; and
4) Performance of all Work in a safe and satisfactory manner

ACTION TAKEN:

X	Approved as Noted		Revise and Resubmit
	Rejected/Resubmit		Not Reviewed / No Action Taken
	Not Submitted		Color Selection Required

REMARKS

Response (Approved as Noted) From: Seth Lehman (Moseley Architects)
Remarks:

AAN, no exceptions taken.

Notes regarding Submittal Review Action Taken:

Approved as Noted: The Contractor is advised that fabrication, manufacturing, purchasing, and/or construction may proceed based on this submittal provided that the work is in full compliance with the Contract Documents.

Revise and Resubmit: The Contractor is advised that fabrication, manufacturing, purchasing, and/or construction may **not** proceed based on this submittal. Provide revised submittal until such time **Approved as Noted** is received from the Architect.

Rejected / Resubmit: The Contractor is advised that fabrication, manufacturing, purchasing, and/or construction may **not** proceed based on this submittal. Provide new submittal which is in full compliance with the Contract Documents until such time **Approved as Noted** is received from the Architect.

Color Selection Required: The Contractor is advised that color selections for the entire project, or portion thereof, will be provided after receipt of **all** color charts / samples required for the Project.

Not Reviewed / No Action Taken: Contractor is advised that this submittal has not been reviewed.

Not Submitted: Contractor is advised that the Contract Documents require a submittal for this Work. Provide a submittal which is in full compliance with the Contract Documents until such time **Approved as Noted** is received from the Architect.

RESPONSES TO SUBMITTAL COMMENTS DATED 1/25/23:

1. Cooling coil cabinet construction is specified to be stainless steel. Provide stainless steel casing or provide corrosion resistant coating. Provide additional details for coating for review.

The factory will apply “Blygold CasingGuard” in the cooling coil sections only. See attached data sheet.

2. Provide 5 hp motor for AHU-01 supply fan. Static is low as submitted. Component pressure drops are 0.58,0.62, 0.09, 0.76 for filters and coils, which results with a 3.8” total static pressure (assuming 50% dirty filters). No pressure drop data is provided for outside air or return air dampers, these should be included in the internal static pressure calculation. The 1.75” ESP scheduled is all losses outside of the unit.

Unit was updated for 5HP motor, 3.8” TSP, and float ESP.

3. Provide 7.5 hp motor for AHU-02 supply fan. Static is low as submitted. Component pressure drops are 0.59,0.64, 0.16, 0.78 for filters and coils, which results with a 3.92” total static pressure (assuming 50% dirty filters). No pressure drop data is provided for outside air or return air dampers, these should be included in the internal static pressure calculation. The 1.75” ESP scheduled is all losses outside of the unit.

Unit was updated for 7.5HP, 3.92” TSP and float ESP.

4. Provide 7.5 hp motors for AHU-03 supply fans. Static is low as submitted. Component pressure drops are 0.59, 0.64, 0.09, 0.92 for filters and coils, which results with a 3.99” total static pressure (assuming 50% dirty filters). No pressure drop data is provided for outside air or return air dampers, these should be included in the internal static pressure calculation. The 1.75” ESP scheduled is all losses outside of the unit.

Unit was updated for 7.5HP, 3.99” TSP and float ESP.

5. Revise acoustic calculations at higher fan speeds and horsepower for all units.

Revised accordingly.

6. 460 and 480 V can be used interchangeably. The motor voltages are acceptable.

7. Condensate traps shall be Trent technologies traps as indicated on drawings and specifications.

Per the spec, contractor shall provide kit and field install condensate drain in accordance with Trent Technologies installation instructions. Units now have 8” base rail to accommodate the Trent Trap.

8. Motors sections indicates that all motors 7.5 hp and greater use shaft grounding rings. Provide shaft grounding rings for all motors.

Shaft grounding rings provided on all motors.

9. Provide the cooling coil water flow velocity and/or Reynolds number at design water flow.

AHU-01

HWC 0.38 FPS
CHWC 1.36 FPS

AHU-02

HWC 1.05 FPS
CHWC 3.51 FPS

AHU-03

HWC 2.23 FPS
CHWC 7.69 FPS

10. Round view windows are indicated as an accessory. Please confirm these are on the cooling coil access door and have a UV protective coating.

Viewing windows will be provided in the sections with UV lamps and include a protective coating.

11. Wire each fan individually for AHU-3. Each fan will be powered by its own independent VFD.

All VTS fans are wired separately to a junction box. VFD's by others.

12. UVC lights shall have door interlock switch as scheduled to disable UVC light upon opening the AHU access door.

This is standard on units with UV.

13. AHU-3 access doors and coil connections are reversed. Access doors and coils should be on the opposite side of the unit.

This has been updated.

14. No wiring diagram included for marine lights. Confirm these are factory wired and provided with unit mounted switch.

Yes, these are factory wired and include a mounted switch.

15. AHU's designed with 6" base rail. 3.5" base rail submitted. Confirm that condensate drain discharge height is high enough for use with Trent Technologies condensate trap. Drain discharge height not indicate in unit drawings.

Bottom units now provided with 8" rails to accommodate Trent Trap.

1 The AVS Standard range Air Handling Units General Specifications

1.1 General

The VENTUS AVS range consists of 15 unit sizes: AVS 8, AVS 12, AVS 16, AVS 20, AVS 30, AVS 40, AVS 55, AVS 65, AVS 85, AVS 100, AVS 130, AVS 170, AVS 230, AVS 300 and AVS 380.. The number following the AVS indicates the airflow of each unit at cooling coil air velocity ≈ 500 FPM. For example, a AVS 170 has a maximum airflow of ≈ 17000 CFM. The ratings shown are based on tests and procedures performed in accordance with AMCA Publications no. 211, no. 311, and no. 511 and comply with the requirements of the AMCA Certified Ratings Program.

1.2 Components and specifications

The following chapter shows general information about all components of VENTUS AVS Air Handling Units. Information included below is common for the entire range of AVS units and is adequate for all units selected for the (UNCW King Hall – TRS NC; John Blakeney) project.

1.2.1 Unit construction - Casing

General Casing Characteristics:

- Concealed Skeleton Design – all framework is inside the unit, unexposed to ambient air and secure against thermal-bridging and condensation.
- Shipping sections, have both double tounge-and-groove and joint sections available.
- Panel thickness: 2.0 in Double Wall
- Insulation material: Rigid Close-Cell Polyurethane Foam
- External skin: 22 gauge steel, AluZinc Coating, exceeding 2,000 hours on the Salt Spray Test (ASTM B117) + thin organic coating
- Internal skin: Hot-dip galvanized 25 gauge steel + thin organic coating
- Color: Metallic Silver
- Panel operation temperature: -40 to +190 °F
- Panel moisture absorption: 0.04%
- PPU density: 2.62 lb/ft³
- Linear Density: 2 lb/ft²
- Casing mechanical strength (deflection): -10 in WC to +10 in WC: L=1/300
- Casing Air Leakage: -1.6 in WC: 0.009 CFM/ft²; +2.8 in WC: 0.026 CFM/ft²
- Casing Thermal Resistance: R = 13.1 Hr×ft²xF / BTU
- Casing Thermal bridging: Kb = 0.69 (Class TB2, EN 1886: 2007)
- Designed for indoor and outdoor installation
- Casing fire rating: Non-fire spreading (ASTM E84).

1.2.2 Fans sets

Each component of fan sets has been described in individual paragraphs, as per below.

1.2.2.1 General Description

All fans installed in VENTUS AVS Air Handling Units are certified according to the AMCA 210 and AMCA 310: Laboratory Methods for Testing Fans. All units shall be equipped with direct driven plenum Fans, with air foil backward-curved impellers with 7 blades made of a polymer composite material; the impellers are installed directly on the motor shafts. All power and sound ratings have been certified by AMCA. All Fan Assemblies are belt-less + AMCA Arrangement 4.

1.2.2.2 Fan impeller mechanical and thermal specifications:

Impellers are featured with the following mechanical specification

- Number of blades: 7
- Composite Material made of SAN (AS) +20 GF
- Density: (ASTM-D792] 74.5 lb/ft³
- Tensile strength: 15.2 PSI [ASTM D-638]
- Impeller balancing: Statically and dynamically balanced to the grade of G=6.3, in accordance to ISO 1940-1 and ANSI D 2.19

- Operating temperature range: -22 °F to 140 °F
- Heat deflection temperature: 215 °F [ASTM D-648]
- Flammability according to UL: HB

1.2.2.3 Motors

Fans are driven by TEFC (Totally Enclosed Fan Cooled) foot mounted motors with double shielded bearings and range from 3 to 15 HP, all motors from 7.5 HP up to 15 HP includes shaft grounding rings as standard. All of the motors used are 3 phase. Nominal frequency: 60 Hz. Insulation class: F. Efficiency class: Premium. Bearing life: L10 = 150,000 h. Motors used in submitted air handling units are (Motor HP, Number of Poles, Approx. Rated Revolutions at 60Hz, and Motor Physical size).

1.2.2.4 Fan Power Supply Point

Connecting Points Features:

- Single power supply connection for each fan section
- Built in short circuit protection (circuit breakers) and main disconnect switch
- Enclosure class: NEMA 4

1.2.3 Filters

Available filters are (depending on selection):

1.2.4 Hydronic Heating Coils

Hydronic heating coils are featured with the following specifications

- Coil casing: Hot-dip Galvanized steel
- Type: Cu-Al: Copper tubes, Aluminum fins
- Fins: Aluminum, mechanically bonded to the pipes, spacing: 10 fins per Inch, 0.006” thick, Corrugated
- Tube wall thickness: 0.020”
- Tube spacing: 1¼”
- Tube diameter: ½ O.D.
- Operational
- Row spacing: 1.08”
- Tube diameter: ½” O.D.
- Maximum operating pressure: 300 PSI
- Entering medium maximum temperature: 285 °F
- Maximum glycol content: 50%
- Tube wall thickness: 0.020”
- Tube spacing: 1¼”
- Row spacing: 1.08”
- Tube diameter: ½” O.D.
- Number of rows available: 1, 2, 3, 4
- Maximum operating pressure: 300 PSI
- Entering medium maximum temperature: 285 °F
- Maximum glycol content: 50%

1.2.5 Hydronic Cooling Coils

Hydronic cooling coils are featured with the following specification

- Coil casing: Galvanized steel or optional Stainless Steel
- Type: Cu-Al: Copper tubes, Aluminum fins
- Fin: Aluminum, mechanically bonded to the pipes
- Spacing: 10 fins per Inch, 0.006” thick
- Tube wall thickness: 0.020”
- Tube diameter: ½ ”O.D.
- Operational
- Tube spacing: 1¼”
- Tube diameter: ½” O.D.
- Maximum operating pressure: 300 PSI
- Entering medium maximum temperature: 285 °F
- Maximum glycol content: 50%
- Tube wall thickness: 0.020”
- Tube spacing: 1¼”
- Row spacing: 1.08”
- Tube diameter: ½” O.D.
- Number of rows available: 4, 6, 8
- Maximum operating pressure: 300 PSI

1.2.6 Air Dampers

TAMCO 9000 SW Series per Spec

All air dampers installed in VTS Air Handling Units are certified according to AMCA 511: Laboratory Methods for Testing Fans for Ratings

- Aluminum blades protected with rubber seals on the edges
- Damper Frame material: Aluminum
- Damper Length: 4.92"
- Damper tightness class according to AMCA: Low Leak
- Damper shaft: square: 0.6x0.6"
- Damper shaft: square: 0.6x0.6"

2 Selections for the UNCW King Hall – TRS NC; John Blakeney

The following Air Handling Units are included in this submittal. Detailed information is listed on further pages.

No.	Project Tag	Model name	Quantity	Page
1	AHU-01 Top Section, Supply	AVS030-R-EV	1	8
2	AHU-01 Bottom Section, Supply	AVS030-L-MFHEC	1	19
3	AHU-02 Top Section, Supply	AVS055-L-EV	1	30
4	AHU-02 Bottom Section, Supply	AVS055-R-MFHEC	1	41
5	AHU-03 Top Section, Supply	AVS100-R-EV	1	52
6	AHU-03 Bottom Section, Supply	AVS100-L-MFHEC	1	63

For each Air Handling Unit detailed information includes:

- Detailed Drawings (CAD version available on request)
- Connecting point - Fan Power Supply and VFD Communication connections
- Air Handling Unit performance data
- Fan curves with operational point marked and motor limit

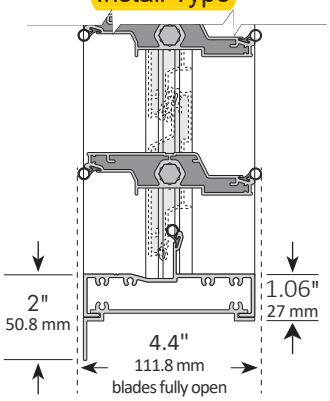
Extended Rear Flange Install Type



1. Extruded aluminum *(6063-T5)* damper frame is not less than 0.080" *(2.03 mm)* in thickness. Damper frame is 4" *(101.6 mm)* deep x 1" *(25.4 mm)*, with mounting flanges on both sides of frame. Damper frame has a 2" *(50.8 mm)* mounting flange on the rear of the damper, when ordered as Extended Rear Flange install type.
2. Blades are 4" *(101.6 mm)* deep extruded aluminum *(6063-T5)* profiles, internally insulated with expanded polyurethane foam and thermally broken. Complete blade has an insulating factor of R-2.29. Each blade seal extends only 0.2" *(5.1 mm)* beyond the frame when in the full open position. All blades are symmetrically pivoted.
3. Blade seals are extruded EPDM. Frame seals are extruded silicone. Seals are secured in an integral slot within the aluminum extrusions. Blade and frame seals are mechanically fastened to prevent shrinkage and movement over the life of the damper.
4. Bearings are composed of a Celcon inner bearing - fixed around a 7/16" *(11.11 mm)* aluminum hexagon blade pivot pin - rotating within a polycarbonate outer bearing inserted in the frame. This eliminates action between metal-to-metal or metal-to-plastic riding surfaces.
5. Adjustable 7/16" *(11.11 mm)* hexagonal drive rod, U-bolt fastener, and hexagonal retaining nuts are zinc-plated steel. These provide a positive connection to blades and linkage.
6. Aluminum and corrosion-resistant zinc-plated steel linkage hardware is installed in the frame side, complete with cup-point trunnion screws for a slip-proof grip.
7. Dampers are designed for operation in temperatures ranging from -40°F *(-40°C)* to 212°F *(100°C)*.
8. Leakage rate through a 36" x 36" *(915 mm x 915 mm)* does not exceed 1.19 cfm/ft² *(6.0 l/s/m²)* against 1 in. w.g. *(0.25 kPa)* differential static pressure. Tested in accordance with ANSI/AMCA Standard 500-D.
9. Dampers are custom made to required size, without blanking off free area. The blade stop is set at a fixed height and is a continuous and integral part of the top and bottom frames.
10. Dampers are available with either opposed blade action or parallel blade action.
11. Dampers are available in four install types: Installed In Duct, Flanged to Duct, Extended Rear Flange, and Square to Round Transition. *(See Install Type pages for details.)*
12. Installation of dampers must be in accordance with TAMCO's current on-line installation guidelines. *(Printed installation guidelines are provided with each damper shipment, however all technical information available on TAMCO's web site at www.tamcodampers.com supersedes information contained within printed versions.)*
13. Intermediate structural support is required to resist applied pressure loads for dampers that consist of two or more sections in both height and width. *(See TAMCO Aluminum Damper Installation Guidelines.)*

OPTIONS FOR NP – NARROW PROFILE:
For each option listed, replace the lines above with their corresponding lines below.

SC - SEVERE COLD TEMPERATURE OPTION:

3. Blade and frame seals are extruded silicone, for reduced air leakage at colder temperatures. Blade and frame seals are secured in an integral slot within the aluminum extrusions and are mechanically fastened to prevent shrinkage and movement over the life of the damper.
8. Leakage rate through a 48" x 36" *(1220 mm x 915 mm)* does not exceed 1.07 cfm/ft² *(5.4 l/s/m²)* against 1 in. w.g. *(0.25 kPa)* differential static pressure. Tested in accordance with ANSI/AMCA Standard 500-D.

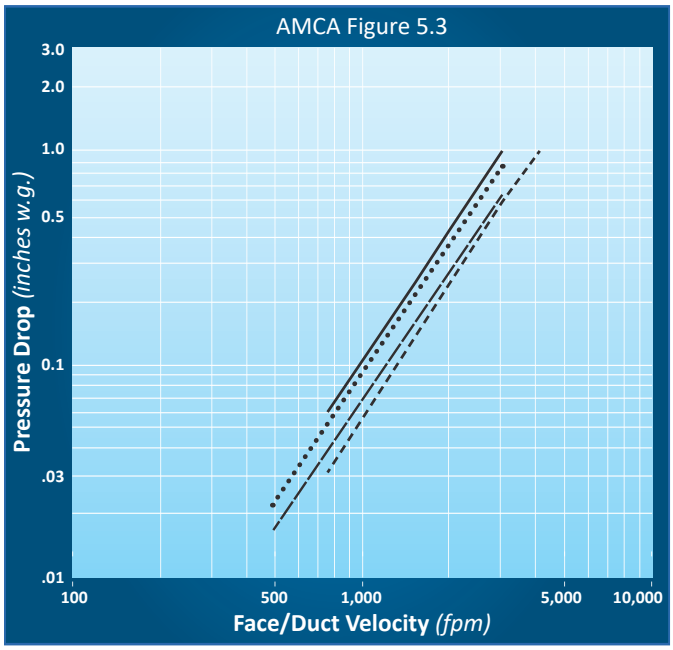
MR - MOISTURE RESISTANCE OPTION:

1. Extruded aluminum *(6063-T5)* damper frame is not less than 0.080" *(2.03 mm)* in thickness. Damper frame is 4" *(101.6 mm)* deep x 1" *(25.4 mm)*, with mounting flanges on both sides of frame. Damper frame has a 2" *(50.8 mm)* mounting flange on the rear of the damper, when ordered as Extended Rear Flange install type. Frame is assembled using stainless steel screws.
5. Adjustable 7/16" *(11.11 mm)* hexagonal drive rod, U-bolt fastener, and hexagonal retaining nuts are stainless steel. These provide a positive connection to blades and linkage.
6. Aluminum and stainless steel linkage hardware is installed in the frame side, complete with stainless steel cup-point trunnion screws for a slip-proof grip.

SW - SALT WATER RESISTANCE OPTION:

1. Extruded aluminum *(6063-T5)* damper frame is not less than 0.080" *(2.03 mm)* in thickness. Damper frame is 4" *(101.6 mm)* deep x 1" *(25.4 mm)*, with mounting flanges on both sides of frame. Damper frame has a 2" *(50.8 mm)* mounting flange on the rear of the damper, when ordered as Extended Rear Flange install type. Aluminum frame is clear anodized to a minimum depth of 0.7 mil *(18 microns)*. Frame is assembled using stainless steel screws.
2. Blades are 4" *(101.6 mm)* deep extruded aluminum *(6063-T5)* profiles, internally insulated with expanded polyurethane foam and thermally broken. Complete blade has an insulating factor of R-2.29. Each blade seal extends only 0.2" *(5.1 mm)* beyond the frame when in the full open position. All blades are symmetrically pivoted. Extruded aluminum blades are clear anodized to a minimum depth of 0.7 mil *(18 microns)*.
3. Blade and frame seals are extruded silicone, for reduced air leakage at colder temperatures. Blade and frame seals are secured in an integral slot within the aluminum extrusions and are mechanically fastened to prevent shrinkage and movement over the life of the damper.
5. Adjustable 7/16" *(11.11 mm)* hexagonal drive rod, U-bolt fastener, and hexagonal retaining nuts are stainless steel. These provide a positive connection to blades and linkage.
6. Clear anodized aluminum and stainless steel linkage hardware is installed in the frame side, complete with stainless steel cup-point trunnion screws for a slip-proof grip.
8. Leakage rate through a 48" x 36" *(1220 mm x 915 mm)* does not exceed 1.07 cfm/ft² *(5.4 l/s/m²)* against 1 in. w.g. *(0.25 kPa)* differential static pressure. Tested in accordance with ANSI/AMCA Standard 500-D.

VELOCITY VS. PRESSURE DROP



LEGEND:

12" x 12" (305 mm x 305 mm)

12" x 24" (305 mm x 610 mm)

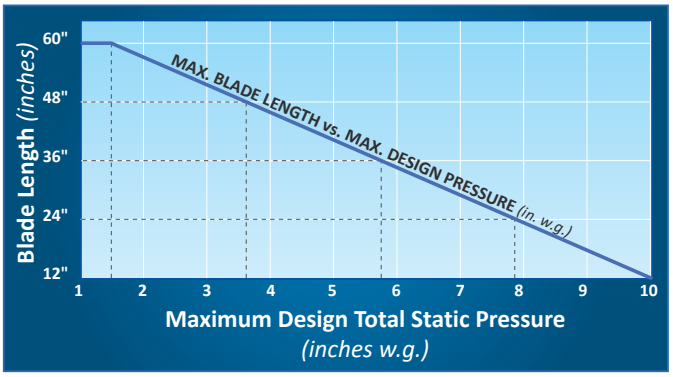
24" x 12" (610 mm x 305 mm)

24" x 24" (610 mm x 610 mm)

FIG. 5.3 Test damper is fully ducted with a 5 diameter duct run upstream, and a 6 diameter duct run downstream. Air Performance testing was conducted in accordance with ANSI/AMCA Standard 500-D.

Pressure drop values are based on Flanged to Duct install type. Pressure drop will be greater for In Duct install type dampers.

BLADE DESIGN PRESSURE LIMITATIONS



Series 9000 dampers with NP – Narrow Profile, whose blade length exceeds the maximum design pressure, may be reconfigured to maintain a blade length compatible with the required system pressure by increasing the number of sections per damper and thereby reducing each damper section's blade length. Appropriate intermediate structural support will be required for all multiple-section damper assemblies. *(Refer to line 13 of the Submittal Data and to TAMCO's Aluminum Damper Installation Guidelines.)*

Example:

A single-section damper of 60"w x 36"h *(1524 mm x 915 mm)* at 5 in. w.g. *(1.24 kPa)* would need to be built in two sections of 30"w x 36"h *(762 mm x 915 mm)*.

INSTALL TYPES | Series 9000

Thermally Insulated Damper with Thermally Broken Blades

- Always provide opening width and height dimensions, when ordering.
- Width dimension is always parallel to blades.
- Height dimension is always perpendicular to blades.

INSTALLED IN DUCT TYPE

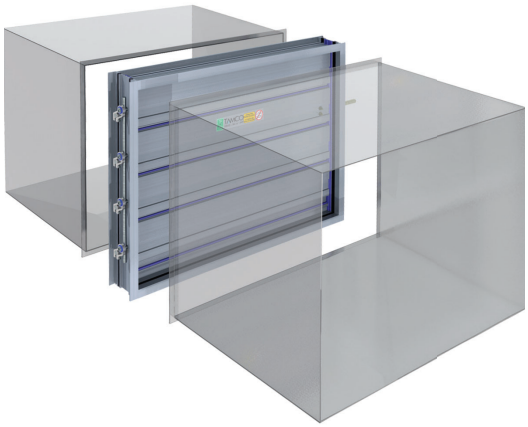
- Applies to SP and NP Profiles only. Not available for WP Profile.
- Finished damper O.D. is ½" *(12.7 mm)* less than opening width and height dimensions.

MINIMUM SECTION SIZE:	
6½"w x 6¾"h	*(166 mm x 172 mm)*
MAXIMUM SECTION SIZE:	
25 ft²	*(2.3 m²)*
60"w x 60"h or	*(1524 mm x 1524 mm) or*
48"w x 75"h	*(1220 mm x 1905 mm)*

FLANGED TO DUCT TYPE

- For SP and NP Profiles, finished damper O.D. is 2" *(50.8 mm)* greater than opening width and height dimensions.
- For WP Profile, finished damper O.D. is 3.25" *(82.6 mm)* greater than opening width and height dimensions.

MINIMUM SECTION SIZE:	
4½"w x 4¼"h	*(115 mm x 108 mm)*
MAXIMUM SECTION SIZE:	
25 ft²	*(2.3 m²)*
60"w x 60"h or	*(1524 mm x 1524 mm) or*
48"w x 75"h	*(1220 mm x 1905 mm)*



EXTENDED REAR FLANGE TYPE

- Applies to SP and NP Profiles only. Not available for WP Profile.
- Finished damper O.D. is 4" *(101.6 mm)* greater than opening width and height dimensions.

MINIMUM SECTION SIZE:	
4½"w x 4¼"h	*(115 mm x 108 mm)*
MAXIMUM SECTION SIZE:	
25 ft²	*(2.3 m²)*
60"w x 60"h or	*(1524 mm x 1524 mm) or*
48"w x 75"h	*(1220 mm x 1905 mm)*

- Extended Rear Flange install type dampers are not designed so that the front of the damper may be inserted into an opening, as the side frame members extend to the full height of the rear flange.

American Ultraviolet

Coil Clean (CC) Series

American Ultraviolet High-output CC Series utility fixtures are designed specifically for HVAC applications. They can be mounted in various configurations for optimum pass-by air decontamination and/or to irradiate cooling coils and drain pans. Individual fixtures can be mounted to plenum walls or multiple fixtures can mount to frame assemblies that span supply ducts or cooling coils.

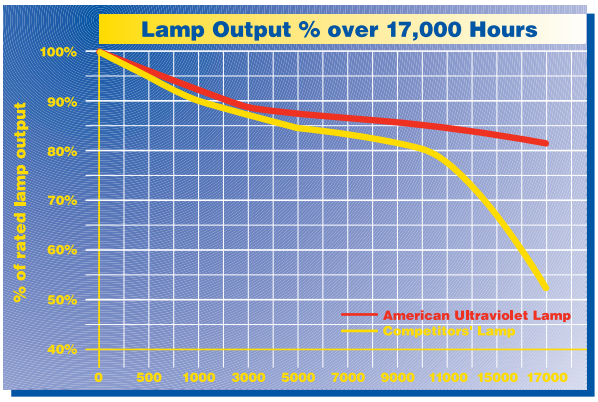
Applications

CC Series fixtures from American Ultraviolet are ideal for internal installation in medium to large air handling systems in commercial, industrial, health care and institutional buildings.

CC Series Fixtures are offered as single and double lamp configurations with "moisture proof" construction. They may be mounted individually; in built-up banks; or in parallel rack-system configurations in a variety of locations, including coils, drain pans, ductwork, mixed air plenums and exhaust systems. The CC Series is available in five lengths (18", 24", 36", 48", and 60") and four voltage options (115, 208, 230 or 277 VAC), providing installation flexibility to accommodate virtually any system.

CC Series fixtures are designed for "moisture-proof" applications with UVC lamps that incorporate a built-in outer quartz sleeve with protective boot on the power end for sealing purposes. Power is brought to the lamp through a waterproof connector that is securely sealed to the lamp with coated lead wires. Lamps are rated for two-year continuous operational life with approximately 20% drop in UVC output at end of lamp life.

CC Series



Benefits

- Improves Indoor Air Quality (IAQ) by reducing bacteria, viruses and mold that either grow or pass through the air handling systems. Reduces the risk of cold, flu, allergies and other illness associated with air handling systems
- "Green" lamps contain ≤8mg of mercury
- Two-year (17,000 hours) guarantee on lamps with only 20% decrease in output over the two years
- Five-year, non-prorated warranty on the ballast
- Continuously cleans coils, drain pans, plenums and ducts - eliminating costly cleaning programs and the use of harmful chemicals and disinfectants
- Reduces HVAC energy costs by restoring heat transfer and net cooling capacity
- Produces no ozone or other secondary contaminants
- Plug-in connections mean no field wiring required to connect fixture to fixture when building banks of rack systems

American Ultraviolet
Since 1960. It's all we do.

AUV CC SERIES

Coil Clean (CC) Series

AUV CC SERIES

CC SERIES SPECIFICATIONS:

Every CC Series fixture is manufactured and factory assembled in the U.S.A., and tested prior to shipment. Each assembly consists of housing, reflector, electronic ballast(s), lamp bracket, plug-in power connectors and high output lamp(s).

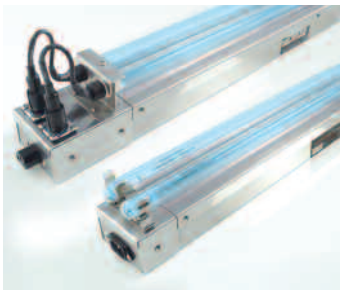
FIXTURE: Housings are constructed of heavy gauge hospital grade stainless steel. Reflectors are fabricated from the highest grade bright annealed polished stainless steel, which has a reflectivity rate of 88% when exposed to short-wave UVC in the range of 254 nm. All components are in one integrated assembly to maximize serviceability.

BALLAST: The solid-state electronic ballast (furnished with this series), is a Class P rapid start with a power factor minimum of .95. It is available as a 120, 208, 230, or 277 VAC 50/60 Hz and is designed to maximize photon production in air temperatures of 35 to 175 degrees F. Minimum ballast start temperature is minus 20 degrees F. Ballasts have a RFI - EMI rating as defined by FCC part 18A for industrial / commercial applications in regards to suppression. Ballasts are UL listed and suitable for use in air handling spaces.

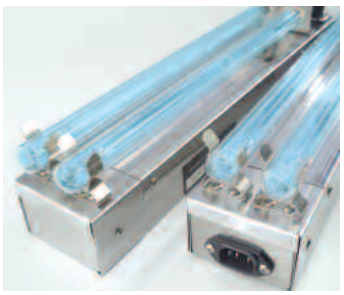
LAMPS: CC Series UVC lamps are high-output (800mA), T5 tube diameter, and constructed from hard glass tubing for superior UV transmittance. Lamps are "green", containing ≤8mg of mercury (Hg) and they produce no ozone. Lamps shall retain, at minimum, 80% of initial output after 17,000 hours of use. They are sealed for moisture protection with a water-tight connection. Electrodes are designed to maximize plasma convection and stability for superior lamp performance. Lamps are rated to produce 11.7 microwatts/cm2 per linear inch of lamp arc length at a distance of one meter. This output has been independently tested in airstreams of 400 feet per minute velocities at temperatures of 45 degrees F.

INDEPENDENT TESTING: Units are tested in accordance with the general provisions of IES Lighting Handbook, 1981 Applications Volume, and provide output per 1" arc length of not less than 11.7 µW/cm2 at 1 meter in a 400 fpm airstream of 45° F.

Water-tight lamp connection



Connect multiple fixtures to one power source



Hardwire fixtures are also available

CORROSION PROTECTION

Cabinet & Casing Coating

- ✓ *Corrosion protection*
- ✓ *UV resistant*
- ✓ *For harsh environments (C1-C5M)*
- ✓ *Abrasion resistant*

Blygold HVAC Cabinet & Casing protection

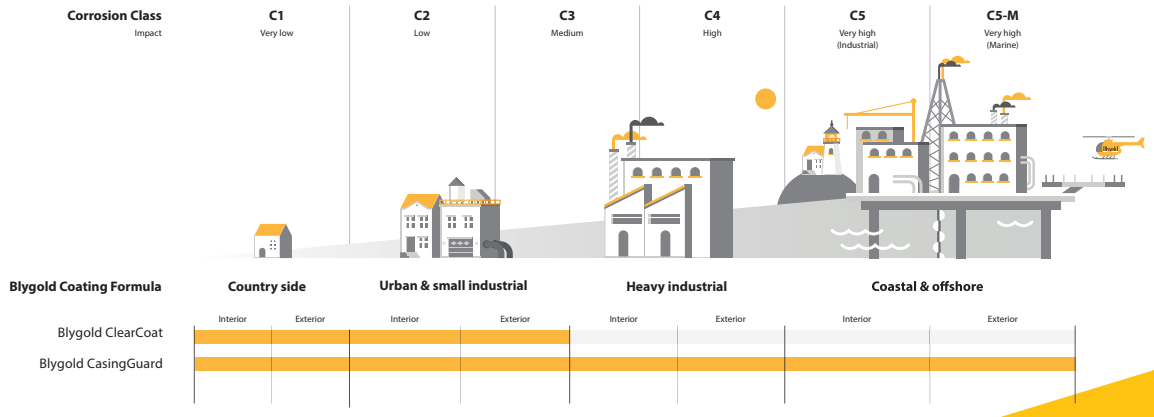
Blygold casing coatings provide a long lasting corrosion protection for HVAC equipment. The coatings are developed to be the perfect add-on to the standard applied OEM coatings systems. The Blygold coating techniques and procedures create protection on all vulnerable surfaces like cutting edges, screws and bolds, tubing and construction parts. The protective coatings can be applied in the factory as well as on-site.

Blygold has been specializing in HVAC equipment coating for more than 40 years. Our applicators know how to handle this vulnerable equipment. Blygold maintains a quality standard that makes customers come back over and over again not only in coating application, but also in logistics and service.

Special coatings and unique applications: HVAC equipment protection calls for specialists

Blygold Casing Coating compliant with ISO 12944-6

To assist corrosion experts, engineers and consultant in selecting the best corrosion protection option for every specific situation, guidelines are set in ISO 12944-6. This international standard describes different corrosion classes, and sets the benchmark on corrosion protection of steel structures by protective paint systems. Blygold coating formulas are compliant with ISO 12944-6.



Designed for the job!

Ever since Blygold was founded in 1976, our core business focused specifically on corrosion protection of HVAC equipment and especially heat exchangers . This makes us unique, and it's the reason why still today Blygold is global market leader in this industry. Our own R&D department is constantly testing and improving our range of products and services. This mentality makes Blygold the benchmark application in our industry. Blygold products are always specifically designed for their purpose. Blygold PoluAl coatings are designed to offer maximum corrosion protection without affecting the efficiency of the heat exchanger. Blygold ClearCoat and Blygold CasingGuard offer optimal protection for cabinet and casings. Blygold CasingGuard system is to be used in severe corrosive conditions while the Blygold ClearCoat system provides good protection for moderate corrosive applications. Your local Blygold representative can help you in deciding which coating system is most suitable for your application.

BLYGOLD CASINGGUARD

Blygold developed the Casing Guard coating system for the most severe exposure conditions. HVAC equipment at oil platforms, coastal environments or wastewater plants are examples where the system has a long track record. All reasonable accessible surfaces are thoroughly pretreated , primed with Refamac 3509 and finished with Refamac 3800. The primer creates excellent adhesion to OEM coatings and bare metals, special metallic pigments provide the first corrosion protective barrier. The finishing coating "3800" is designed to create coverage even on vulnerable sharp edges. The thin layer technology creates a smooth and extremely protective finish with limited layer thickness.

BLYGOLD CLEARCOAT

Blygold Clearcoat is a transparent coating system that enhances the existing OEM coating properties. The coating adheres directly to several coating types without special primer or pre-treatment. The finished surface has ahigh gloss and has a extremely long resistance against UV exposure. The application of the Blygold Clearcoat will also bring back faded colours of HVAC equipment. The thin and smooth film has repellent properties that limits the adhesion of pollution. The coating is applied after thorough cleaning of all visible surfaces of the HVAC equipment. Because of the transparency of the coating, the unit will maintain the original OEM colour.

TECHNICAL INFORMATION	BLYGOLD CASINGGUARD	BLYGOLD CLEARCOAT
Color	Ral 7001 (or as specified)	Transparent
Pretreatment	Degreasing, sanding and primecoat Refamac 3509	Degreasing (Blygold CoilClean AP)
Substrates	Bare metals, plastics & OEM coatings	OEM coatings
Gloss retention ASTM G154 / ISO11507	5.000h >75%	30.000h >90%
Adhesion ASTM 3359 b	5B	5B
Saltspray test ASTM B117 / ISO 9227-NSS	>7.500h	>4.000h (OEM coating dependent)
Pull of test ISO 4624 / ASTM D4541	9,3 MPa / 9,1 MPa	ND
Class acc. standard ISO 12944 PART 6	C5-I	C3-C4 (as finish in system)
Layer thickness	4-6 mil (100-150 micron)	1-2 mil (25-50 micron)
Abrasion resistance ASTM D4060	-	150 mg / 4.000 turns
Flexibility ASTM D522	-	10 mm

BLYGOLD INTERNATIONAL

Blygold is an innovative and forward-thinking company offering unique and sustainable high-quality protection against corrosion. With over 40 years experience, we have the know-how and state-of-the-art products and techniques to solve any corrosion problem. Our multitude of success stories says it all.

Application protocols

To protect air-conditioning equipment from corrosion in aggressive conditions, the quality of the application process is just as important as the applied product. Blygold has developed specific application protocols for air-conditioning equipment of all different dimensions, geometries and materials.

Global network

To ensure our products are applied according to these protocols, Blygold works with trained and certified applicators only. Our global network of qualified Blygold applicators can offer local support in over 60 countries around the world.

Quality

- Over 40 years of experience
- Unique application techniques
- Unrivalled test results
- All trained & qualified applicators
- ISO 9001 Certified

Innovation

- Revolutionary R&D
- Inhouse laboratory
- Deep understanding of the market
- Global awareness of customer needs
- Problem solving mentality

Sustainability

- Lifetime extension
- Energy saving & Eco Friendly
- Life Cycle Cost reduction
- Maintenance friendly
- Corporate Social Responsibility

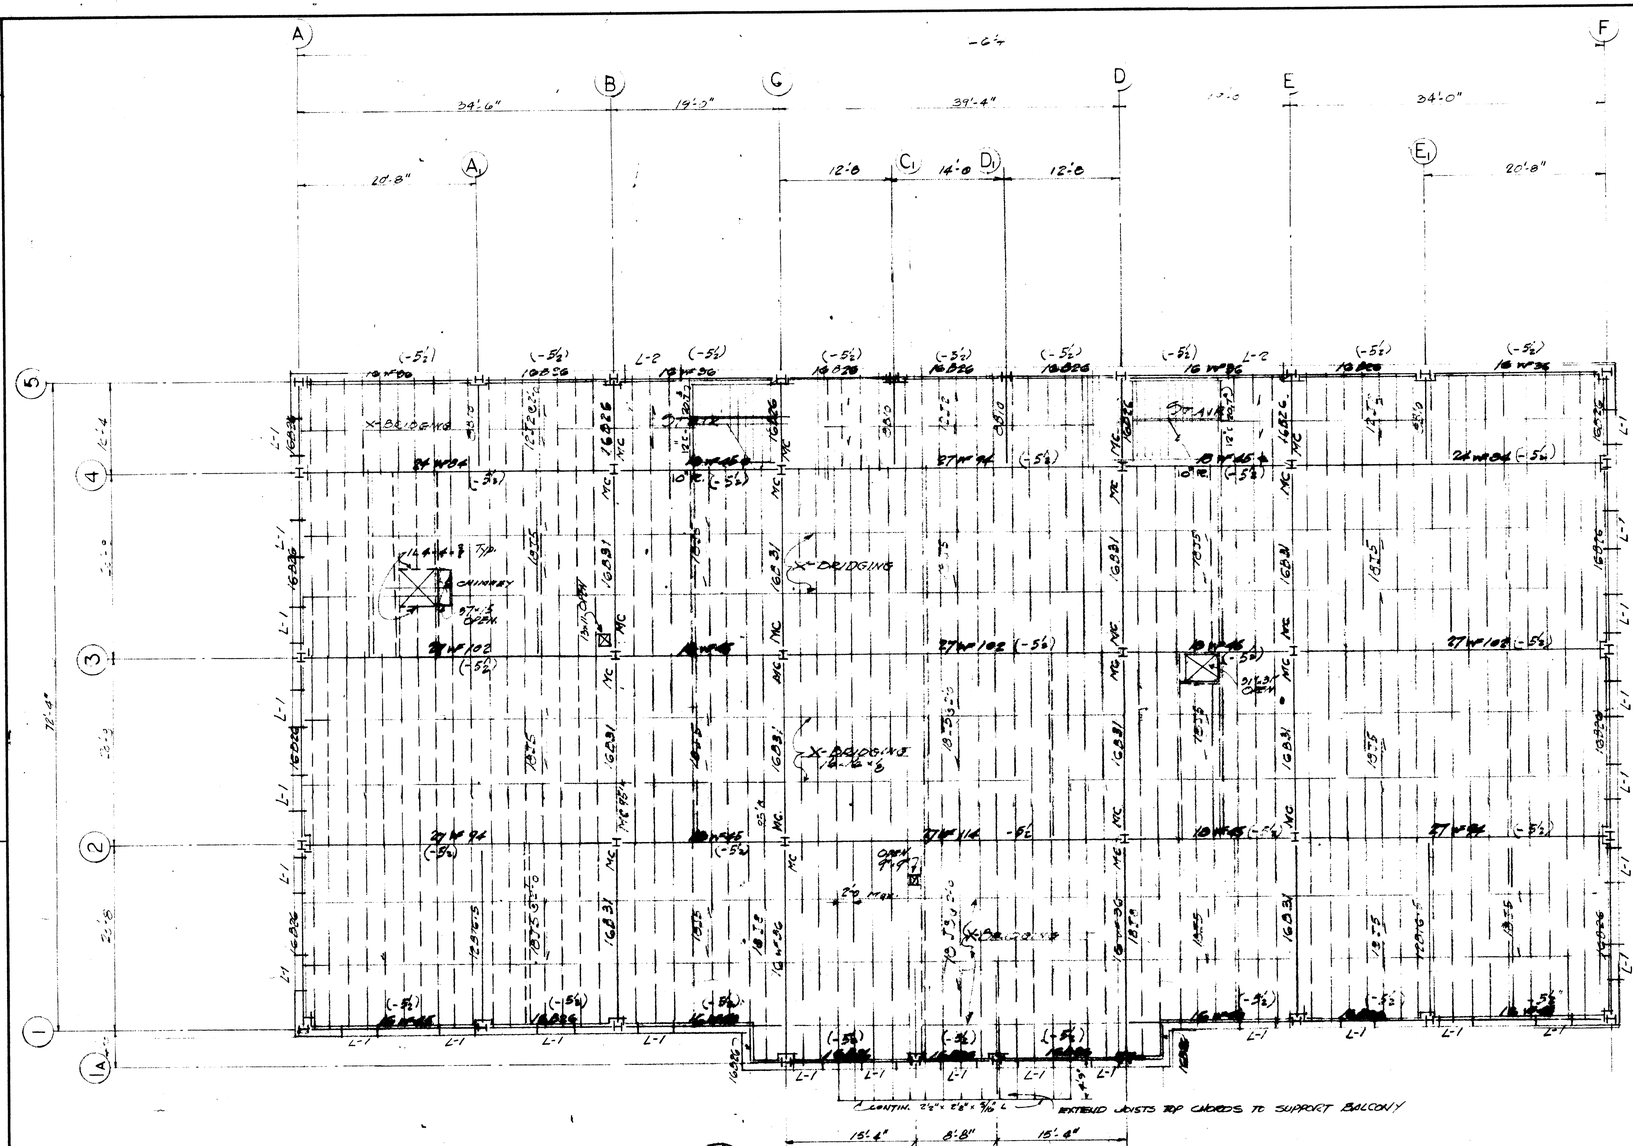
NORTH CAROLINA SEAL REGISTERED ARCHITECT



SECOND FLOOR FRAMING PLAN 1/8"=1'-0"

FL. FIN. FLOOR 61'0" TOP OF STEEL -3" U.O.N.

STEEL JOISTS:

1. STEEL, DESIGN, FABRICATION, AND ERECTION: STANDARD SPECIFICATIONS OF THE STEEL JOIST INSTITUTE.
2. BOTTOM CHORD OF JOISTS TO BE 2 ANGLES. PROVIDE CEILING EXTENSIONS AS SHOWN ON ARCHITECT'S DRAWINGS.
3. BRIDGING (SPACING PER SJI SPECS.) ALL BRIDGING TO BE CROSSED ANGLES WELDED IN PLACE.
4. WELD JOISTS TO STEEL SUPPORTS WITH 1" OF ⅜" FILLET EACH SIDE OF JOIST, U.O.N. ALL WELDING TO BE BY WELDERS AS UNDER "STRUCTURAL STEEL".
5. WHERE JOISTS BUTT OVER A 4" FLANGE, WELD JOISTS TOGETHER AS WELL AS TO BEAM. LENGTH OF JOISTS TO BE EXACT.
6. WELD DECK TO JOISTS PER DECK MFR'S RECOMMENDATIONS, U.O.N.
7. UNDER JOISTS, PROVIDE CONCRETE LINTEL BLOCKS REINFORCED.
8. PROVIDE DOUBLE JOISTS UNDER ALL PARTITIONS PARALLEL TO JOISTS, U.O.N.
9. WHERE JOIST LAYOUT PERMITS, THE BEARING END OF ALL JOISTS ARE TO BE CENTERED OVER THE WEB OF THE SUPPORTING BEAM. DIAGONAL MEMBERS AND BASE ℙ ARE TO BE SO DETAILED. A TOP CHORD EXTENSION IS NOT ACCEPTABLE IN LIEU OF THE SPECIAL BEARING DETAIL. NOTE ON ERECTION DRAWINGS THE BEARING CONDITION AT THESE JOISTS.
10. THE DESIGN OF ALL JOISTS FURNISHED SHALL HAVE BEEN SUBMITTED TO AND APPROVED BY THE STEEL JOIST INSTITUTE.

STRUCTURAL MASONRY:

1. LOAD-BEARING MASONRY PIERS OR WALLS, MASONRY RETAINING WALLS, FOUNDATION WALLS, WALLS DESIGNATED ON DRAWINGS AS SHEAR WALLS AND OTHER MASONRY SO DESIGNATED ON DRAWINGS ARE CONSIDERED HERE TO BE STRUCTURAL MASONRY.
2. COMPRESSIVE STRENGTH OF MASONRY UNITS:
   - CLAY UNITS . . . . . 3000 PSI
   - CONCRETE UNITS . . . . . 2000 PSI ON NET AREA
3. COMPRESSIVE STRENGTH AT 28 DAYS OF MORTAR FOR STRUCTURAL MASONRY TO BE 2500 PSI MINIMUM. OTHER PROPERTIES OF MORTAR TO BE IN ACCORDANCE WITH ASTM C161 AND C270.
4. WHERE CONCRETE FILL IS SHOWN IN HOLLOW MASONRY UNITS, USE CONCRETE OR MORTAR OF 2500 PSI MINIMUM 28-DAY STRENGTH. COMPACT WELL TO FILL VOIDS COMPLETELY.
5. REINFORCING GRADE AND DETAILS AS FOR CONCRETE. TIE IN POSITION AND PLACE CONCRETE AROUND REINF DURING CONSTRUCTION OF MASONRY. DO NOT PUSH REINF DOWN INTO PREVIOUSLY PLACED CONCRETE FILL. SET BOLTS SIMILARLY.
6. TIE WYTHES WITH HORIZONTAL REINF AS SPECIFIED.

"AS-BUILT" DRAWING
DATE JUN 10 [illegible]

GENERAL NOTES

GENERAL:

1. DESIGN LIVE LOADS:
   - ROOF: 30 LBS PER SQ FT.
   - FLOOR AREAS: MECHANICAL + 150; CORRIDORS - 100; STAIRS - 100; OTHER AREAS - 60
   - WIND: 35 LBS PER SQ FT.
2. "U.O.N." MEANS "UNLESS OTHERWISE NOTED".
3. SUBMIT ALL STRUCTURAL SHOP DRAWINGS IN QUADRUPLICATE. DO NOT FABRICATE MATERIAL UNTIL APPROVAL OF ARCHITECT IS RECEIVED.
4. ALL SPECIFICATIONS REFER TO LATEST EDITION.
5. ALL LINTELS BEAR 8" MINIMUM EACH SIDE OF OPENINGS.
6. CONTRACTOR RESPONSIBLE FOR DISSEMINATION OF REVISIONS TO CONTRACT DOCUMENTS AND REQUIREMENTS TO ALL SUB-CONTRACTORS.
7. ALL SAFETY REGULATIONS TO BE FOLLOWED STRICTLY.
8. NOTES BELOW ARE NOT INTENDED TO REPLACE WRITTEN SPECIFICATIONS. SEE SPECIFICATIONS FOR REQUIREMENTS IN ADDITION TO GENERAL NOTES.
9. METHOD OF ERECTION OF ALL STRUCTURAL MATERIAL IS ERECTOR'S RESPONSIBILITY. CONSULT ARCHITECT IN CASE OF QUESTIONS.
10. STRUCTURAL FRAME TO BE BRACED UNTIL ERECTION IS COMPLETE AND PERMANENT CONNECTIONS, VERTICAL BRACING, OR MASONRY BRACING IS INSTALLED.

FOUNDATIONS:

1. ALLOWABLE SOIL PRESSURE ASSUMED 5000 PSF MINIMUM, TO BE VERIFIED IN THE FIELD BEFORE CONSTRUCT.
2. No THUS DENOTES ELEVATION OF TOP OF WALL FOOTINGS OR GRADE BEAMS, U.O.N.
3. No THUS DENOTES ELEVATION OF TOP OF COLUMN FOOTINGS, U.O.N.
4. FTGS TO BE RAISED OR LOWERED FROM ELEVATIONS SHOWN ON DRAWINGS AS DIRECTED BY ARCHITECT WITH ADJUSTMENT IN CONTRACT USING UNIT PRICES.
5. WALLS ACTING AS RETAINING WALLS SHALL NOT BE BACKFILLED WITHOUT BRACING UNTIL ALL SUPPORTING SOIL AND SLABS IN PLACE AND AT ADEQUATE STRENGTH.
6. PROVIDE WELL-BRACED SHORING AT EXCAVATIONS NEAR EXISTING BUILDINGS TO PREVENT SETTLEMENT.
7. COMPACT ALL FILL UNDER BUILDING TO 95% MAXIMUM DENSITY AS DETERMINED BY ASTM D1557. PLACE IN LAYERS 8" MAXIMUM LOOSE THICKNESS. VERIFY FIELD DENSITY, ASTM D1556, WITH AT LEAST ONE TEST PER 5000 SQ FT PER LAYER. ALL TESTS TO BE AT EXPENSE OF OWNER.
8. SELECT AND PLACE POROUS BACKFILL AT RETAINING WALLS CAREFULLY.

CONCRETE:

1. CONCRETE COMPRESSIVE STRENGTH IN 28 DAYS: 3000 LBS PER SQ INCH.
2. REINFORCING BARS: INTERMEDIATE GRADE NEW BILLET STEEL DEFORMED BARS, ASTM A15 AND A305.
3. WELDED WIRE FABRIC: ASTM A185
4. USE REGULAR STONE CONCRETE FOR ALL CONCRETE.
5. GROUT: ONE PART TYPE I PORTLAND CEMENT AND 2½ PARTS SAND BY VOLUME.
6. BAR DETAILS AND SUPPORTS: ACI BUILDING CODE AND ACI DETAILING MANUAL. LAP ALL SPLICES 30 DIAMETER, U.O.N.
7. CLEAR DISTANCE FROM FACE OF CONCRETE ON MAIN STEEL:
   - SLABS . . . . . 3/4"
   - BEAMS, COLS, AND WALLS . . . 1½"
   - FOOTINGS . . . . . 3" BOTTOM - SIDES 2"
8. PROVIDE WIRE MESH IN ALL SLABS ON THE GROUND, 1½" FROM TOP OF SLAB:
   - 4" SLABS 66-1010
   - 5" SLABS 66-66
9. PROVIDE ¾" X 45° CHAMFER ON ALL EXPOSED CONCRETE EDGES.
10. PROVIDE DOUBLE JOISTS UNDER ALL PARTITIONS PARALLEL TO JOISTS, U.O.N.
11. WELDING TO BE BY WELDERS AS UNDER "STRUCTURAL STEEL".
12. ALL 3" CONCRETE FLOOR SLABS REINFORCED WITH W.W.F. 66-1010.

STRUCTURAL STEEL:

1. STRUCTURAL STEEL: ASTM A36
2. DESIGN, FABRICATION, AND ERECTION: AISC SPECIFICATIONS FOR BUILDINGS.
3. DESIGN CONNECTIONS FOR FULL STRENGTH OF MEMBER UNLESS LOADS ARE SHOWN ON THE DRAWINGS. SHOP CONNECTIONS: WELDED. FIELD CONNECTIONS: ¾" HIGH TENSILE STRENGTH BOLTS, ASTM A325, U.O.N.
4. WELDS SHALL BE MADE ONLY BY OPERATORS CERTIFIED BY THE STANDARD QUALIFICATION PROCEDURE OF THE AMERICAN WELDING SOCIETY FOR TYPE OF WELD REQUIRED.
5. PROVIDE ERECTION BOLTS AS REQUIRED FOR WELDED CONNECTIONS. ERECTION BOLTS EXPOSED OUTSIDE SHALL BE REMOVED AND HOLES PLUGGED AS DIRECTED BY THE ARCHITECT. GRIND IF REQUIRED.
6. RETURN ALL WELDS AT CORNERS TWICE THE NOMINAL SIZE OF THE WELD MINIMUM.
7. WELDED CONNECTIONS TO EXISTING MEMBERS CARRYING STRESS TO BE MADE TO REDUCE WARPING TO MINIMUM. SHORE OR BRACE EXISTING MEMBER DURING WELDING OPERATION.
8. GENERAL CONTRACTOR TO SUBMIT A STATEMENT BY ERECTOR THAT HE IS FAMILIAR WITH SPECIFICATIONS FOR STRUCTURAL JOINTS USING ASTM A325 BOLTS AS ENDORSED BY THE AISC.
9. PROVIDE 8x½x0'-8" BASE ℙ WITH 2-½x1'-0" ANCHOR BOLTS UNDER ALL BEAMS BEARING ON MASONRY, U.O.N.
10. PROVIDE ¾" MINIMUM GROUT UNDER COLUMN BASE ℙS. GROUT TO CONTAIN A NONSHRINK ADMIXTURE EQUAL TO "EMBECO".
11. PROVIDE HOLES FOR BLOCKING AS PER ARCHITECT'S DRAWINGS.
12. DEFORMED BAR ANCHORS SHOWN WELDED TO STEEL SHAPES TO BE FURNISHED WITH SHAPES. BARS TO BE ASTM A15 AND A305.
13. WHERE MEMBERS WERE DESIGNED USING PLASTIC STRENGTH, FOLLOW AISC SPECIFICATIONS FOR SPECIAL FABRICATION TECHNIQUES.
14. FABRICATOR SHALL PROVIDE ALL BOLTS NECESSARY FOR ERECTION.
15. ALL STEEL SHAPES SHOWN ON STRUCTURAL DRAWINGS BY STRUCTURAL STEEL CONTRACTOR UNLESS NOTED MISCELLANEOUS STEEL.
16. UNLESS NOTED, ALL END CONNECTIONS FOR BEAMS TO BE PROPORTIONED FOR REACTIONS FOR FULL UNIFORM WORKING LOAD ON CORRESPONDING SPAN.

SCHEDULE OF METAL GAUGE, JOINTS AND BRACING FOR DUCT WORK

U.S. STD. GA. FOR GALV. IRON	MAX. MUM SIDE IN INCHES	TYPE OF TRANSVERSE JOINT CONNECTIONS:	BRACING
26	UP TO 12"	S, DRIVE, POCKET OR BAR SLIPS ON 7'-10" CENTERS	NONE
24	13" TO 24"	S, DRIVE, POCKET OR BAR SLIPS ON 7'-10" CENTERS	NONE
	25" TO 30"	S DRIVE, 1" POCKET OR 1" BAR SLIPS ON 7'-10" CENTERS *	1"x1"x⅛" L'S 4'-0" FROM JOINT
22	31" TO 60"	DRIVE, 1" POCKET OR 1" BAR SLIPS ON 7'-10" CENTERS *	1"x1"x⅛" L'S 4'-0" FROM JOINT.
	41" TO 60"	1½" L CONNECTIONS OR 1½" POCKET OR 1½" BAR SLIPS WITH 1⅜" x 1⅛" BAR REINFORCING ON 7'-10" CENTERS. *	1½"x1½"x⅛" L'S 4'-0" FROM JOINT
20	61" & UP	1⅜" L CONNECTIONS OR 1½" POCKET OR 1½" BAR SLIPS, 3'-4" MAX CENTERS WITH 1⅜" x ⅛" BAR REINFORCING.	1½"x1½"x⅛" DIAGONALS OR 1½"x1½"x⅛" L'S. 2'-0" FROM JOINT.

* DUCT SECTIONS OF 3'-9" MAY BE USED WITH BRACING L'S OMITTED INSTEAD OF 7'-10" LENGTH'S WITH JOINTS INDICATED
ALL UNINSULATED DUCTS 18" AND LARGER TO BE CROSS BROKEN. CROSS BREAKING MAY BE ELIMINATED IF TWO GAUGES HEAVIER METAL IS USED.

NOTE: THE DUCT WORK CONTRACTOR SHALL TAKE PROPER MEASUREMENTS ON THE JOB AND CHECK SPACE FOR CLEARANCES, OBSTRUCTIONS, ETC., BEFORE FABRICATING DUCT WORK. DUCTS MAY BE ADJUSTED SLIGHTLY IN SIZE IN ORDER TO FIT CONSTRUCTION CONDITIONS AS LONG AS THE CROSS SECTIONAL AREA OF THE DUCTS REMAIN THE SAME IN SIZE AS GIVEN ON THE PLANS.

MUTER CONSTRUCTION
CUSTOMERS FOR LIFE

Form of Proposal

Project: UNCW King Hall Renovations

Bid Package: BP09A – Drywall, Metal Studs, Insulation, FRP

Bidder: _____

NC License # (if applicable)_____

Date: _____

Bid Time: _____

The undersigned, as bidder, hereby declares that the only person or persons interested in this proposal as principal or principals is or are named herein and that no other person than herein mentioned has any interest in this proposal or in the contract to be entered into; that this proposal is made without connection with any other person, company or parties making a bid or proposal; and that it is in all respects fair and in good faith without collusion or fraud. The bidder further declares that he has examined the site of the work and the contract documents relative thereto, and has read all special provisions furnished prior to the opening of bids; that he has satisfied himself relative to the work to be performed. The bidder further declares that he and his subcontractors have fully complied with NCGS 64, Article 2 in regards to E-Verification as required by Section 2.(c) of Session Law 2013-418, codified as N.C. Gen. Stat. § 143-129(j).

BID PACKAGE(s): BP09A – Drywall, Metal Studs, Insulation, FRP

Base Bid:

_____Dollars ($)_____

ALLOWANCES (included in base bid)

1. None

ALTERNATES

Should any of the alternates as described in the contract documents be accepted, the amount written below shall be the amount to be "added to" or "deducted from" the base bid. (Strike out "Add" or "Deduct" as appropriate.)

1. Alternate No. 1 – Replace existing windows and window shades
   _____Dollars ($) (Add/Deduct)
2. Alternate No. 4 – Provide 2 new exterior windows at Room 201A
   _____Dollars ($) (Add/Deduct)
3. Alternate No. 6 – Replace hollow metal frames @ doors S100, S101.2, S200, and S201
   _____Dollars ($) (Add/Deduct)
4. Alternate No. 8 – Reconfigure and update men's toilet room
   _____Dollars ($) (Add/Deduct)
5. Voluntary Alternate No. V1 – Add Scope of work from BP09C – Acoustic Ceilings
   _____Dollars ($) (Add/Deduct)

UNIT PRICES (not included in base bid)

Unit prices quoted and accepted shall apply throughout the life of the contract, except as otherwise specifically noted. Unit prices shall be applied, as appropriate, to compute the total value of changes in the base bid quantity of the work all in accordance with the contract documents.

1. None

MINORITY BUISNESS PARTICIPATION REQUIREMENTS

Provide with the bid - Under GS 143-128.2(c) the undersigned bidder shall identify on its bid (Identification of Minority Business Participation Form) the minority businesses that it will use on the project with the total dollar value of the bids that will be performed by the minority businesses. Also list the good faith efforts (Affidavit A) made to solicit minority participation in the bid effort.

NOTE: A contractor that performs all of the work with its own workforce may submit an Affidavit (B) to that effect in lieu of Affidavit (A) required above. The MB Participation Form must still be submitted even if there is zero participation.

After the bid opening - The Owner will consider all bids and alternates and determine the lowest responsible, responsive bidder. Upon notification of being the apparent low bidder, the bidder shall then file within 72 hours of the notification of being the apparent lowest bidder, the following:

An Affidavit (C) that includes a description of the portion of work to be executed by minority businesses, expressed as a percentage of the total contract price, which is equal to or more than the 10% goal established. This affidavit shall give rise to the presumption that the bidder has made the required good faith effort and Affidavit D is not necessary;

* OR *

If less than the 10% goal, Affidavit (D) of its good faith effort to meet the goal shall be provided. The document must include evidence of all good faith efforts that were implemented, including any advertisements, solicitations and other specific actions demonstrating recruitment and selection of minority businesses for participation in the contract.

Note: Bidders must always submit with their bid the Identification of Minority Business Participation Form listing all MB contractors, vendors and suppliers that will be used. If there is no MB participation, then enter none or zero on the form. Affidavit A or Affidavit B, as applicable, also must be submitted with the bid. Failure to file a required affidavit or documentation with the bid or after being notified apparent low bidder is grounds for rejection of the bid.
